PREFACE.

"Things for the cook, sir; But I know not what."—Romeo and Juliet.

In presenting this Book of Recipes to our friends we desire to say that it has not been the design of the committee to give a complete cook book, full in all departments.

But we trust it will prove an assistance to the housekeepers who are engaged in the stupendous task of cooking for the nation.

Our sincere thanks are extended to the ladies of Monmouth for the recipes. The signatures are a sufficient guarantee for their excellence.

We especially ask our friends to read the advertisements that they may know who have given us substantial aid. We ask for them an increased patronage, which their generosity to all our public enterprises justly merits.

In making soups, put all uncooked meats and bones in cold water. If cooked in hot water, adding a little at a time. Use a flat-bottomed pot and keep on top of stove. It is better if made the day before wanted. When cold remove fat, re-heat and strain, adding vegetables as desired. Brown stock is made of beef shins and a piece of coarse beef. White stock, of veal shins and an old fowl, if you choose. One shin of veal will make three quarts of good veal stock, one hind shin of beef will make five quarts—a piece of each makes the best soup. All kinds of bones can be used, and all liquor in which beef, mutton or poultry is boiled. Wash shins—put on in cold water, skim just before it boils, simmer slowly four or five hours or longer. Boil vegetables separately, and add to soup stock a short time before serving. Barley, rice, tapioca, vermicelli, macaroni and all vegetables may be used separately or together. Also, add the water in which they are boiled. Serve very hot.

To make rice, vermicelli, macaroni or barley soup, boil thoroughly in separate vessel and add about quarter of an hour before serving. Cabbage, tomatoes or the soup boquet, or other vegetables may be also added, separately or together.
SOUPS.

BOUILLON.

Four pounds juicy beef, one tablespoon salt, two pounds bone, one tablespoon mixed herbs, four peppercorns, four cloves, two quarts water. Cut meat and bones in small pieces, boil down to three pints, season to taste. Add one onion, one-half carrot and turnip if you like; strain and re-heat.

ASPARAGUS SOUP.

S.

One bunch of asparagus boiled in a quart of salted water for twenty minutes. Press the asparagus through a colander. Put a quart of milk into a double boiler, adding a little parsley and a piece of onion. For thickening use two ounces of butter and three level tablespoonsfuls of flour rubbed together and thinned by stirring in a little of the milk. Then stir into the boiling milk and stir continually until it thickens. Have the asparagus and water in which it was cooked, hot and mix all together. Season and serve at once.

S.

CELERY SOUP.

S. C. K.

Take four or six stalks of celery, wash and cut into small pieces, using the leaves as well, cover with a pint or more of boiling water, and let boil half an hour. Press through a colander, do not drain, but allow the water to go through with the celery. Have in a double boiler one quart of boiling milk and a slice of onion, to this add the celery and water. Rub together one tablespoon of butter and two tablespoons of flour. Stir into boiling soup. Season with pepper and salt, and serve.

BAKED WHITEFISH.

Cleanse carefully. Wipe dry, rub with salt and dredge with flour, fill with dressing, and tie up or sew. Place in hot pan with a few slices of salt pork across it, or use butter. Pour in enough hot water to prevent burning. A four or five pound fish will require from one to one and a half hours. If a cloth is put in the pan first, the fish can be lifted up without breaking. Dressing:—Use bits of stale bread soaked in cold water, press dry, add one onion chopped fine, salt, pepper and butter. Add two or three eggs if desired.

CODFISH BALLS.

S. B.

Pick three-fourths of a pound of codfish very fine. Wash in several waters or soak fifteen minutes. Boil with a dozen medium sized potatoes—putting the codfish on top. The correct thing in Invitation and Menu Cards, always at McQuiston's.
CREAM FISH.

Two pounds of white fish or red snapper. Boil it after the fish has been skinned and boned, pick it into fine pieces; one-half cup butter and two-thirds pint or more of cream. Put the cream on the stove in a double boiler. Put two tablespoonful of flour into the butter, add pepper and salt to taste, and put into the boiling cream. Beat until done. Pour this over the fish. Then bake and serve hot. Will serve ten persons.

Allow one quart of milk to one cup of fish. Season with salt, pepper and butter, and thicken with a little flour. If desired add one or two eggs, well beaten or broken in whole and lightly stirred in, or the eggs may be previously boiled.

BAKED CODFISH.

Pick up one teacup of codfish. Let it cook in lukewarm water while you mix two cups of cold mashed potatoes with one pint of sweet milk, two eggs, a good sized lump of butter, pepper and salt if necessary. Add codfish. Mix all together. Pour in pudding dish and bake twenty-five or thirty minutes.
BOILED SALMON OR HALIBUT.

Mrs. A. B. Seaman,

Three or four pounds of fish. Dip in boiling water and scrape clean. Rub with salt and pepper. Put in pan and pour milk over it till half an inch deep. Bake about an hour, basting with the milk. Is nice with Hollandaise sauce made as follows: One-half cup butter, yolks of two eggs, juice of one-half lemon, one saltspoon salt, few grains cayenne pepper, one-half cup boiling water. Rub butter to a cream, add yolks, one at a time, and beat well; then add lemon juice, salt and pepper. Just before serving add boiling water, stir rapidly till it thickens like custard. Pour sauce around the fish on platter.

OYSTER PATTIES.
Mrs Dr. Kimmel.

Make puff paste in this way: To every pound of flour add three-fourths of a pound of butter, the yolk of one egg; use ice cold water; chop half the butter into the flour, then stir in the egg; work all into a dough; roll out thin; spread on some of the butter, fold closely (butter side in) and roll again; do this until the butter is all used up. Keep the paste in a cool place while you prepare the oysters. Set the oysters on the stove with liquid enough to cover them. As soon as they come to a boil skim them, stir in a little butter and pepper, also, if desired, a little cream. Line your small tins with the paste; put three or four oysters in each, add a little of the liquor, then cover with paste. Bake in a quick oven twenty minutes. While hot wash over the top with a beaten egg.

butter to cream, and stir into one pint of boiling milk. Stir the oysters into the sauce while boiling hot. Season with salt and pepper. Cover with rolled crackers, place in oven and bake.

**OYSTER PIE.**

Two cans of oysters, or three pints of solid oysters, one quart of cream, one dozen rolled crackers. Pepper and salt. Stir all together, and pour into a dish lined with thick puff paste. Cover with another paste and bake three-quarters of an hour. This is a delicious mode of cooking oysters.

**OYSTER FRITTERS.**

Mrs. W. D. Bell.

Strain the oysters and remove all bits of shell. Cut the oysters slightly. For a pint of oysters use a pint of flour, sifted and mixed with a level teaspoon of salt. Put the flour in a mixing bowl with the yolk of one egg, a teaspoon of salad oil (butter if you prefer) and a pinch of pepper. Use enough of the oyster liquor to make a batter thick enough to drop from the spoon. Beat the white of the egg to a stiff froth. Mix the oysters and the white of egg lightly with the batter and as soon as mixed drop by the large spoonful into a kettle of hot lard and fry a nice brown. Lay a brown paper on a dripping pan and take fritters out on this to drain. Set in the oven to keep hot while frying the rest.

Mix well and let stand five minutes. Add a little salt and pepper. Mold into small cakes with two or three oysters in each cake. Roll in dry cracker and fry in butter. Serve hot. HOW TO ROAST MEAT.

Mrs. Emma P. Ewing, of the school of domestic economy at the Iowa Agricultural College, says:

In roasting meats of all kinds the method adopted should be the one that in the most perfect manner preserves the juices inside the meat. To roast beef in the best possible manner, place the clean cut side of the meat upon a smoking hot pan, which must be over a quick fire. Press it close to the pan until seared and slightly browned. Reverse and let the opposite side become similarly seared and browned. Then put it at once in the oven, the heat of which should be firm and steady, but not too intense, and leave it undisturbed until cooked. The time that should be allowed for cooking beef in this manner is twenty minutes to the pound, if it is to be rare, less half an hour deducted from the aggregate time on account of searing. In other words, a five-pound roast of beef will require an hour and a quarter, a six-pound roast an hour and a half, and so on.

If the oven is not too hot the beef requires no basting, and is better without it. When the oven is at the proper temperature, and the cooking is going on all right, the meat will keep up a gentle sputtering in the pan. If, upon opening the oven door, this sputtering is not perceptible, more heat

Hodgens' Pine Apple Ice.
is required. But, if in addition to the sputtering, any smoke is discernable in the oven, the heat is too intense, and should be lessened. Unless the heat of the oven is too great, the drippings in the pan will burn and smoke, and when the meat is cooked there will be a thin coating of brown jelly in the pan where the meat rested, which, by the addition of stock or water, will make a delicious gravy.

A roast of beef should never be washed, and if it has been accidentally wet or moistened, it should be carefully wiped dry before it is seared or put to cook. Searing almost instantly coats the cut side of a piece of meat, and prevents the escape of juices in the after-process of roasting, while a firm, steady heat gently but thoroughly cooks it, and thus both juices and flavor are preserved. Basting is a troublesome, as well as a damaging, process. And as salt and water have a tendency to toughen and extract the juices of meat, they should not be used on it while roasting, if it is desired to have the meat sweet, juicy and tender.

**ROAST BEEF.**

The best pieces for roasting are the sirloin and rib pieces. When roasting in an oven dash a cup of hot water over the meat; this checks the escape of the juices. Baste frequently with salt, and water and the drippings. If your fire is hot, allow twelve minutes to the pound, if you like the beef rare; more if you prefer it well done. Thicken the gravy with browned flour.

TO ROAST BEEF.

M.

Put into pan without water, unless in gasoline stove oven, when put in sufficient water to keep from burning. Do not season. Allow twelve minutes to a pound for a rare roast, longer if it is desired better done. Make gravy in usual way. The best way ever roasted.

GRAVY FOR TURKEY.

B. M.

An excellent way to roast turkey. Wash thoroughly and wipe dry. Do not salt. Fill with dressing. Put without water in double roaster. Do not baste. Keep fire enough to hear a gentle sizzle. Bake twenty minutes for each pound. One and one-half hours before it is done pour over a gravy made of three large cups boiling water, three tablespoons flour, first mixed with small quantity of water and one-half cup of butter and salt to taste. This gives sufficient moisture to the turkey and makes delicious gravy, rich and brown.

A good dressing may be made of bread crumbs, butter, pepper and salt, nutmeg, sage, and onions if desired, well buttered slices of bread. Make about right proportion.

Chicken is excellent baked in this way. Allowing at least twenty minutes to each pound.

POT ROAST OF BEEF.

B.

Take four pounds ribbed beef, ribs taken out and rolled. Put some beef drippings in porcelain-lined kettle, rub beef with salt and put it into the hot drippings. Let it cook one hour, turning it frequently, then add water and cook one hour longer. Re-

move to platter and thicken the gravy with flour and butter made into a paste.

**GOOD STEAK.**

Mrs. Dr. W. P. Smith.

In the first place buy good steak—porterhouse—have it cut *two inches thick*; remove all the bone and most of the fat, put the steak upon a heavy hard wood block and with an iron beater—2 inch face and 36 sharp teeth, (mine weighs 2 lbs.)—bring the meat to *one-half an inch in thickness*. For a gridiron use a large double bread toaster; open this and place the steak upon one side, adjusted to the thickness you desire it when broiled; close down the other half of toaster, pushing the slide clear up, to fasten the meat at the proposed thickness, place this over a bed of very hot coals for about ten seconds—this seals the surface and prevents the juicees running—turn it and cook the other side done, slightly browning it; then turn the first side and cook that the same—steak should be broiled quick, and is best if not overdone, but so that when cut 'tis very juicy and a little red in centre—unclose the handles of your broiler and with forks remove your steak to a hot platter, season nicely with salt and pepper, and place about the surface small pieces of butter, put it in the oven long enough to melt this, then to the table, and it is ready for the carver.

**SPICED BEEF.**

Mrs. B.

Take a piece of beef from the fore quarter, weighing ten pounds—those who like fat should select a fatty piece, those who prefer lean may take the shoulder clod or the upper part of the

*C. Shultz for anything in the Drug line.*
fore leg—take one pint of salt, one teacup of molasses or brown sugar, and tablespoon of ground cloves, allspice and pepper, and two tablespoons of pulverized saltpetre; place the beef in a deep pan, rub with this mixture, turn and rub each side twice a day for a week, then wash off the spices, put in a pot of boiling water, and, as often as it boils hard, turn in a teacupful of cold water; it must must simmer for five hours on the back part of the stove; press under a heavy weight till it is cold and you will never desire to try corned beef of the butcher again, your pickle will do for another ten pounds of beef, first rubbing into it a handful of salt, it can be renewed and a piece kept in preparation every day.

TO BROIL A STEAK, CHICKENS, GAME OR FISH IN THE OVEN.
K. C. S.

Place the meats in a double wire broiler, put the broiler over the baking pan containing an inch of cold water, place the pan on the top shelf of the oven, which should be very hot—for sirloin steak, from eight to ten minutes, other articles according to size and heat of the oven.

SPICED ROAST.
Mrs. J. A. Hanna.

For this either beef or mutton can be used. Prepare for roasting by seasoning with salt and pepper, then add one half-dozen whole cloves, one dozen whole allspice, 3 tablespoons sugar, one-third pint vinegar and two-thirds water; roast very slowly until about a half hour before serving,

Hodgens’ Tuty Fruty Cream.
when let it brown in a very hot oven. Baste often and add water as needed.

**SPRING CHICKEN.**

Take a nice spring chicken, or a young one. Clean and wash thoroughly and put in a kettle with a pint and a half of cold water. Let it boil twenty minutes, or until tender, but not until it falls to pieces. Take out of the water. Save the water for the gravy. Split open the chicken on the back. Put in a dripping pan, add salt and pepper and little pieces of butter. Then dredge it with flour, allowing some of the flour to fall into pan. Put into a hot oven and brown. Watch it, and after it has been in ten minutes—for if the chicken is young it takes only a few minutes—thirty at the most. Take out of pan and put on a platter. Take the stock, thicken and put it into the dripping pan where the chicken has just been taken out, and cook it until smooth, stirring constantly. It ought to be brown if some of the flour and butter that the chicken was baked in was left. Lastly, pour over the chicken and serve hot. If one has an old fowl it must be boiled or hour or two before it will be tender enough to split open.

**JELLIED CHICKEN.**

Mary Patterson.

Boil a fowl until it will slip easily from the bones, let the water be reduced to about one pint in boiling. Pick the meat from the bones in good sized pieces, taking out all gristle, fat and bones. Place in a wet mold, skim the fat from the liquor. A little butter, pepper and salt to the taste, and one-half ounce of gelatine. When this dissolves pour it hot over the chicken. The liquor must be seasoned pretty high, for the chicken absorbs.

Take a hog's head, heart, tongue and part of the liver. Cleanse thoroughly and soak in salt water twenty-four hours. Put on to boil in cold water. Cook until all the bones can be easily removed. Then thicken with corn meal and a teacup of buckwheat flour till the consistency of mush. Then dip out in deep dishes, and when cool slice and fry a rich brown, as you would mush. It is very nice for a cold morning breakfast. If you make more than you can use at once, run hot lard over the rest and you can keep it all through the winter.

**FRIED PARSNIPS.**

*M. P.*

Peel and boil; when done, drain, season with pepper and salt, dip first in melted butter, then in flour, and dust with sugar. *Mrs. Patterson.*

Mash and season one half dozen potatoes. Mold them while warm into the shape of small pears, dip them in the beaten yolk of egg, stick in the small end of each pear a clove (the large end of the clove in the potato), to represent the stem. ONION PIE.
Mrs. Pen D. Good.

Take one dozen onions, cut up and put in a skillet with butter and lard and fry till soft; then add half cup of sweet cream, half cup of milk, two eggs, and thicken it with a little paste made of milk and flour; then season with pepper and salt; bake the pie crust first and have ready: when you get the onions all done, put in the baked crust and set in oven long enough to brown on top.

ONIONS.

This healthful vegetable should be eaten oftener and would be if it were not for the disagreeable odor. The following way of preparing modifies this and prevents the burning sensation often felt in the stomach. Slice very thin, pour over boiling water, let them stand five minutes or longer, serve with a very little vinegar and salt: excellent with salad dressing.

HOW TO BOIL RICE.

Pick your rice clean and wash it in two cold waters, not draining off the last water until you are ready to put the rice on the fire. Prepare a saucepan with water and a little salt. When it boils sprinkle in the rice gradually so as not to stop the boiling. Boil hard for twenty minutes, keeping the pot covered. Then take it from the fire and pour off the water, after which set the pot on the back of the stove with the lid off to allow the rice to dry and the grains to separate.

Remember—Boil rapidly from the time you cover the pot until you take it off; this allows each grain to swell to three times its normal size and the motion prevents the grains from sticking together. Don't stir it as this will cause it to fall to the bottom and burn. When properly boiled, rice should be snowy white, perfectly dry and soft, and every grain separate and alone.

Then put in plenty of salted hot water and boil two or three minutes. Return to colander and drain. Put in saucepan with milk or cream and butter and cook till tender. Generally no more cooking is required.

A cook can not acquire a more valuable accomplishment than that of making good bread. Nothing but experience will secure the name merited by so few—"an excellent bread maker." The first requisite is good flour; the second, good yeast; the third, watchful care. There is force in the old lament, "My bread took cold last night," too much heat carries forward the process too rapidly and the dough will become sour. Correct this by dissolving a little soda in warm water and working it in well. The oven should not be too hot. If you can not hold your bare arm in it while you count thirty, it is too quick. Keep the heat steady after the bread goes in. The time for baking is not less than three-quarters of an hour, and bread baked an hour is more wholesome.

YEAST.
Mrs. Seth Pratt.

Three pints of water, six large potatoes. When potatoes are done take the potato water and pour over one pint of flour, then add one tablespoon of salt. Mash the potatoes thoroughly and mix with the flour, and thin with cold water until cold enough to put in the yeast. Use two and one-half cakes of Magic yeast.

one-half cake of dry yeast dissolved. At night add 1 quart of warm water and make a sponge, beating well; in the morning add one-half cup of sugar, one-half cup of melted lard and salt, and mix till smooth. Let rise, knead down, let rise again, then make into loaves, let rise and bake. To save out three or four tablespoons of the scalded yeast, before making sponge, is better for the next baking than using fresh yeast.

This will make three good sized loaves.

Set this crock of sponge in flour in your bread pan, cover and set in a warm place until morning. Then use the warm flour and mix into a stiff dough, make it stiff enough so you will not need to add more flour to knead well afterward; set in a warm place until light, then knead thoroughly once and set to rise again, when light divide into four equal parts and make four loaves, or three loaves and one pan of rolls; set in a warm place to rise, when light, bake in a moderate oven three-quarters of an hour. **EASY AND SURE WAY TO MAKE GOOD BREAD.**

tablespoons sugar, and one-half teaspoon salt, and one pint of the yeast; knead well and put in warm place, when light knead again, when light, again, make in four loaves and put in pans. PUFF PASTE.

Take equal quantities of flour and butter, before mixing wash the butter thoroughly, then lay in ice water. Take the flour, adding a teaspoonful of salt for each pound of flour, mix into a stiff, smooth paste, using ice water for mixing, allow the dough to lie five minutes, after which roll large enough to work in butter, fold twice so it will be four thicknesses, repeat five times, leaving the paste about ten minutes each time, then work paste in desired form, a cool place is desirable for making paste.

PIE CRUST.

Three cups of flour to one of lard makes three pies. Rub lard lightly in flour; salt. Pour in enough ice water to roll out; mix lightly with a knife. For lemon, chocolate and all pies of that character, bake the crust first, prick lightly with a fork to prevent blistering, then add the custard already prepared by cooking in double boiler. This is much better than where the custard is baked in the pie.

GOOD PIE CRUST.

A quart of flour will make four pies. Sift the flour with a teaspoon of baking powder; rub in a quarter of a pound of lard or butter, then moisten with ice water, using as little as will make the flour stick together. Do not work it with warm hands.

CAKES.

"He that would have a cake out of the wheat, must tarry the grinding. Hereafter the kneading, the making of the cakes, the heating of the oven, and the baking; nay, you must stay the cooling, too, or you may chance to burn your lips."

—Troilus and Cressida.

Cake makers often condemn the recipe when the fault lies in themselves. Here are a few general rules: Always use the best materials. When commencing have all the ingredients ready, weighed or measured, the tins lined with paper and greased (or grease the pans, have them cold and dust well with flour.) For cakes which require long baking use several layers of paper. Use granulated sugar dried and sifted. Always dry the flour and sift it four times with the baking powder into a dry dish. In making anything of the cake kind begin with the shortening and sugar, creaming them with the hand in a deep earthen bowl to a light and delicate consistency, adding the yolks of eggs, which should be beaten separately from the whites, stirring them in thoroughly with a wooden spoon; then add milk or water gradually, beating all the time. This adding of the liquid slowly prevents curdling. Or alternate with flour a little at a time. Add flavor, then flour, and finally fold in the whites of the eggs, beaten to a coarse froth, stiff enough to cut with a knife, but never to the hard, dry froth which some patent egg beaters give. Use a fork or wire spoon for beating. In the folding process the motion with the spoon is from right to left.

GOOD COFFEE.
There are four essentials to good coffee—the best coffee, an egg, cream and a clean coffee pot. The coffee pot should be emptied, washed and scalded and dried every time it is used.

Take one tablespoon of best coffee for each person and half a pint of water, let it boil five minutes, then remove from the fire at once.

To make coffee for twenty persons use one and one-half pints of ground coffee. Mix with egg and cold water and put in cheesecloth bag. Pour over one gallon boiling water. Let stand where it keeps hot. Serve with whipped cream.

TEA.
Scald tea pot and put tea in while hot, using one teaspoon of tea for each person (if strong tea is desired,) to one-half pint boiling water. Let stand a few moments before serving.

ICED TEA.
Make strong tea. After standing a few moments to extract strength, pour off and let cool. Add water to desired strength. Pour over cracked ice and serve with sliced lemon.

C. Shultz. Extract of Beef. All kinds of foods for invalids.
RUSSIAN TEA.

Pare and slice good juicy lemons and lay a piece in the bottom of each cup; sprinkle with white sugar, and pour hot, strong tea upon it. Do not use cream.

CHOCOLATE.

Dissolve three tablespoons of scraped chocolate, or equal parts of chocolate and cocoa, in a pint of boiling water and boil for fifteen minutes; add one pint of rich milk; let scald and serve hot.

CHOCOLATE—VIENNA STYLE.

Four ounces of chocolate, one quart milk, three tablespoons of hot water, and one tablespoon of sugar.

Cut the chocolate in fine bits. Put the milk on the stove in the double boiler, and when heated to the boiling point, put the chocolate, sugar and water in a small iron or granite-ware pan, and stir over a hot fire until smooth and glossy. Stir this mixture into the hot milk, and beat well with a whisk. Serve at once, putting a tablespoon of whipped cream in each cup and then filling up with the chocolate.

The plain chocolate may be used instead of the vanilla, but in that case use a teaspoon of vanilla extract and three generous tablespoons of sugar instead of one.

BLACKBERRY CORDIAL.

Secure ripe berries and crush them; to each gallon of juice add one quart of boiling water; let it stand twenty-four hours, stirring it a few times; strain and add two pounds of sugar to each gallon of liquid; put in jugs and cork tightly. It may be used in two months, is excellent for summer complaint, and can be taken by delicate invalids.

BOUILLON.

To one pound of round steak add one and one-half tumblers of cold water, cut the beef in small pieces, cover and let simmer until the substance is all out the meat, then strain and return to the stove to keep hot. WATER MELON SWEET PICKELS.

Linnie Brewer.

Pare the rinds, cut in pieces diamond or square shaped, take one large teaspoon of pulverized alum to as many as you can cover with water in a gallon crock—the water should taste well of the alum—let stand from twenty-four to thirty-six hours, as may be convenient, pour off the alum water, let stand in cold water thirty minutes. Should any of the pieces be soft trim it off, as they should be firm. Cover with water—may be warm but not boiling—put one cup sugar and several pieces of ginger
root, let simmer but not boil hard until the pieces are clear. Try with a straw, as they become clear and tender, take out in a colander, let drain, do not wait until all are done, and don't put all in the colander at once for if crowded they will mash, thak in a large pan. When all are done weigh and soke as much sugar as fruit, make a syrup and pour over the fruit, do the same for four days, cooking the syrup each day until quite thick; on the fourth day add one quart of vinegar, two tablespoons of stick cinnamon broken in small pieces, heap the spoon and put in the syrup, one tablespoon cloves pounded and tied in a cloth, drop in and cook until it tastes well—if you like more spice you can put it in—put in the fruit and let heat through. Put up in glass jars.

WATER MELON RINDS.

Pare and cut in any shape, pour over them weak alum water, hot; let stand twenty-four hours, then pour off, rinse well, and boil in clear water until tender, make a syrup of equal measures of vinegar and sugar, some stick cinnamon and race ginger, boil the rinds in this till clear, put in jar, cover and put away.

One dozen green cucumbers peeled and sliced fine, one peck green tomatoes, four heads cabbage small and solid, one dozen onions, three pints cider vinegar, three ounces white mustard seed, one ounce celery, one ounce tumeric, one-fourth pound box Coleman's mustard, one and one-half pounds of sugar. Slice all the vegetables with a cabbage slicer. Put each separately in a weak brine for an hour or two, drain in a cheese cloth, put in layers in a kettle. Mix mustard with cold vinegar
adding tumeric, then gradually add boiling vinegar and sugar. Put one-third vegetables in kettle, pour on vinegar, then add another third, etc. If too moist do not use all the vinegar. Boil slowly until tender, and put in glass jars hot.

FONDANT FOR FRENCH CANDY.

Theo Sexton.

One-half cup of water to two of granulated sugar; add a pinch of cream of tartar. Boil without stirring for ten minutes, then try by dropping a little in cold water. Then flavor and mould. This may be used as a foundation for any French candy. Nuts, dates and figs may be used with the fondant, making a variety. For chocolate creams, roll the fondant into small balls; let them get perfectly hard, dip them into melted chocolate to which has been added some of the hot melted fondant.

Eight ounces sal soda, six ounces borax, two and a half pounds Maple City Self-Washing soap, ten quarts rain water. Shave soap, add to water, with sal soda and borax. Heat until thoroughly dissolved—about an hour. Use half cup to each pail of water to soak clothes over night, add one cup to boil in. The mixture may be used only to boil the clothes, washing in usual way. It is excellent to whiten them and for washing flannels.

"Modest doubt is called the beacon of the wise."

FRAGMENTS.

"A good Wit will make use of anything." Henry IV.

A GOOD SUBSTITUTE FOR BUTTER, AND BEEF DRIPPINGS.

Get best kidney suet; put to boil in milk, allowing one-half teacup to each pound of suet; lift from bottom occasionally to prevent burning. When the milk has boiled out you can dip off grease, which will be of a delicate flavor. The suet is improved by soaking a few hours in cold water. Excellent to put with lard in frying doughnuts.

Pinch of salt helps the whites of eggs to beat more quickly.

Dough for breakfast rolls may be kept for several days on ice.

A spoonful of vinegar in a kettle of hot lard will prevent doughnuts from absorbing fat.

A few pieces of zinc put in a stove, where you use soft coal, will clean the pipe from soot.

Turpentine mixed with stove polish prevents rust and gives a higher gloss than water.

Mica in stoves can be made clean by washing with vinegar and water.

Cleansing fluid (Fine.)

Six drachms alcohol, two drachms ammonia, one drachm oil of sassafras, one drachm chloroform, $\frac{1}{4}$ drachm pulverized borax. Mix and shake well, then add one quart deodorized gasoline.

Few love to hear the sins they love to act.
Fresh lard will remove tar and grass stains.

Ink stains can be removed from the fingers by rubbing them with a match. The sulphur will soon erase all stains.

For washing clothes easily and securing best results in every way, the use of Maple City Self-Washing Soap is heartily recommended.

The best cement for mending china or glass is white lead. Put away three or four months before using.

Always keep mixed linseed oil and lime water in the house for burns. Get the druggist to prepare 5 cents worth for you.

Apply hot water to a bruise. It will prevent swelling and discoloration.

Put two or three handfuls of corn meal and one of graham flour in your buckwheat cakes.

5 cents worth of Chinese blue, dissolved in one quart of soft water and kept in corked bottles, makes an excellent bluing, and will last a family a year.

Eat oranges and cranberries for breakfast. They are good for the liver.

Give your children plenty of brown bread and milk, and well made corn meal bread, and fruit at meal times.

Try a teaspoon of kerosene in the water in which you wash windows and woodwork.

Use the white of an egg in making mustard plasters. If the mustard is strong, use part flour. This will prevent blistering.

Dissolve copperas in your drain pipes often to clean out the slime and grease and thoroughly disinfect them.

Better three hours too soon than a minute too late
For starching muslins dissolve one tablespoon of white gum arabic in a cup of water. Clean and dry your muslins before wetting in this solution. Iron right side down.

TO WASH BLANKETS.

One ounce pulverized borax, one-half pint soft soap. Put in cold soft water; soak over night. Rinse in two waters in morning, squeeze but not wring and hang up without wringing. For one blanket. Makes them soft and is easily done.

Pour sauce around puddings and fish, not over them.

Everything to be browned, should be handsomely browned, not burned.

Pineapple juice or grated pineapple added to lemonade is delicious.

Serve rich, creamy buttermilk with cracked ice. Healthful and nutritious.

One teaspoon sweet cream in frosting prevents crumbling when cut.

Pour hot water on raisins. They are more easily seeded.

To test eggs put them in water. If the large end turns up they are not fresh.
