GENERAL INDEX OF VOLUMES I-X
(1879-1888)

OF THE

AMERICAN

Chemical Journal

W. R. ORNDORFF, A.B., Ph.D.,
Assistant Professor of Chemistry, Cornell University.

Baltimore
1890
Press of Isaac Friedenwald,
32 S. Paca Street.
PREFACE.

After the first ten volumes of the American Chemical Journal had appeared, it was thought desirable that a general index should be prepared. Accordingly, at the suggestion of Professor Remsen, the work was taken up and completed by the author.

The system made use of is simple and needs but a few words to make it clear. In the Index of Authors' Names the name of the author is printed in heavy type, and the various articles published by him are arranged in chronological order under this head. The subjects are also printed in heavy type in the Index of Subjects, but here the alphabetical order is observed under each subject.

As far as possible the initials of every author are given, but in some cases it was impossible to obtain these from any source. The letters a, o, and u with the umlaut (ä, ö, ü) have been treated as a, o and u. In the case of Russian authors the same spelling has been used which occurs in the German journals. Books reviewed have been indexed under the first important word of the title. The di-substitution products of benzene have been indexed under o, m and p according as they are ortho-, meta- or para-, the prefix being regarded as a necessary part of the word.

Every precaution has been taken to avoid errors.

W. R. Orndorff.

Cornell University, March, 1890.
CORRECTIONS.

Page 42, line 40 from top, for 352 substitute 235.

American Association for Advancement of Science, sub-section of chemistry, at Saratoga,—I, 291.
—— at Boston,—II, 274.
—— at Cincinnati,—III, 291.
Amido acids, action of alkyl iodides on,—VII, 195.
Amido-meta-toluic acid,—III, 428.
\(\beta\)-Amidoparatoluic acid,—X, 479.
\(p\)-Amidophenetol,—I, 271.
\(\gamma\)-Amidopyridine,—VIII, 389.
Amidopyridine, esters,—VIII, 395.
Amidotoluic acid, transformation into chlor- and brom-metatoluic acid,—III, 430.
—— transformation into oxytoluic acid,—III, 428.
Amines, aromatic, compounds with silver nitrate and sulphate,—I, 239.
Ammonia, absorption apparatus for,—I, 450.
—— absorption in nitrogen determinations with soda-lime,—X, 111.
—— determination in plant juices and extracts,—V, 457.
—— estimation,—IV, 402.
—— improved apparatus for estimating,—IV, 402.
—— new compounds with hydrochloric acid,—I, 212.
—— test for,—IV, 402.
Ammonia process for water analysis,—IV, 188.
Ammonium and ammonia compounds, vapor density of,—II, 153.
Index of Subjects.

Ammonium chloride, manufacture,—I, 359.
  — chloride solutions, nitrification in,—II, 45.
  — ferrous sulphate as a reagent for nitric acid,—V, 209.
  — fluoride, purification,—V, 389.
  — hyposulphite, substitution for hydrogen sulphide in qualitative analysis,
    —V, 215.
  — new reagent for,—VII, 133.
  — phospho-molybdate, precipitation in presence of salts of organic
    acids,—III, 232.
  — sulphocyanide, action on monobromacetone,—X, 213.
  — uranate,—X, 219.
Amyl alcohol, use,—I, 446.
Amylolytic and proteolytic action, influence of bile, bile salts and bile acids
on,—VII, 36.
Analysis, qualitative, Eyster’s scheme for,—VII, 110.
  — qualitative without hydrogen sulphide,—V, 215; VII, 21, 110.

Arsenio-tungstates,—II, 289.
Arsenous acid, determination in presence of arsenic acid,—III, 69.
Arsenio-vanadates,—VII, 226.
Arsenio-tungstates,—II, 289.
Arsenous acid, determination in presence of arsenic acid,—III, 69.
Arsenio-vanadates,—VII, 226.
Arsenio-tungstates,—II, 289.
Arsenous acid, determination in presence of arsenic acid,—III, 69.
Arsenio-vanadates,—VII, 226.
Arsenio-tungstates,—II, 289.
Arsenous acid, determination in presence of arsenic acid,—III, 69.
Arsenio-vanadates,—VII, 226.
Arsenio-tungstates,—II, 289.
Arsenous acid, determination in presence of arsenic acid,—III, 69.
Arsenio-vanadates,—VII, 226.
Arsenio-tungstates,—II, 289.
Arsenous acid, determination in presence of arsenic acid,—III, 69.
Arsenio-vanadates,—VII, 226.
Arsenio-tungstates,—II, 289.
Arsenous acid, determination in presence of arsenic acid,—III, 69.
Arsenio-vanadates,—VII, 226.
Arsenio-tungstates,—II, 289.
Benzene, action of sulphurous anhydride on,—IX, 67.
— from coal tar, thiophene in,—V, 300.
— structural formula,—II, 437; III, 154.
**Benzene-derivatives**, oxidation with potassium ferricyanide,—V, 97; VII, 145; VIII, 176; IX, 93; X, 472.
Benzenes of different origin,—IV, 481.
Benzene-sulphonic acid, amine salts of,—X, 129.
— new metallic salts of,—X, 136.
Benzene-trisulphonic acid,—IX, 325.
Benzyl, action of aldehydes and ammonia on,—VII, 1.
— condensation compounds with ethyl alcohol,—VII, 16.
Benzile, action of alcoholic hydrocyanic acid on,—VII, 190.
Benzoic acid, action of chromic superfluoride on,—VII, 343.
— manufacture,—I, 446.
Benzoic aldehyde, action of hydrocyanic acid on,—VII, 193.
— behavior towards phenol,—IX, 130.
Benzoic sulphinide,—VIII, 223.
— ethers,—IX, 406.
— formation,—I, 428.
Benzoic, action of alcoholic hydrocyanic acid on,—VII, 193.
Benzol, oxidation,—VII, 114.
Benzoltrisulphamide,—IX, 338.
Benzoltrisulphanilide,—IX, 346.
Benzoltrisulphochloride,—IX, 335.
Benzoltrisulphonic acid,—IX, 325.
Benzoltrisulphonic ester,—IX, 337.
Benzquinone, action of hydrocyanic acid on,—VII, 192.
Benzoylacetacetic acid,—VII, 159.
Benzoylacetic ether, preparation,—VII, 156.
α-Benzyolamidosalicylic acid,—V, 24.
Benzoylbenzoltrisulphamide,—IX, 343.
Benzoylmethyltoluenesulphamide,—VIII, 242.
Benzoylmethyltoluenesulphamide,—VIII, 242.
Benzoyl-ortho-nitranilide, reduction of,—VI, 26.
Benzoyl-ortho-phenylenediamine,—VI, 27.
Benzoylparamidodinitrophenol,—V, 27.
Benzoylphenyltoluenesulphamide,—VIII, 242.
Benzoyltoluenesulphamide and derivatives,—VIII, 352.
Benzyl aldehydes,—III, 30.
Benzyl bromides, chemical activity of substituted,—III, 252.
— substituted,—I, 95.
Benzyl compounds, substituted,—I, 93; II, 1, 85, 158, 250, 315, 383; III, 30, 246, 252; V, 264.
Benzylidimethylamine,—IX, 78.
Index of Subjects.

Beryl from Amelia Co., Va., analysis,—VII, 175.
Beryllium (or glucinum), atomic weight,—II, 369, 435; VI, 215.
Beth-a-barra, coloring matter from,—III, 22.
Bichromate of potassium, manufacture,—I, 358.
Bile acids, action on proteid matter, etc.,—VI, 201.
— bile salts and bile acids, influence on amylolytic and proteolytic action,—VII, 36.
— coloring matter, formation,—VI, 198.
Bisilicate from Nelson Co., Va., analysis,—VII, 180.
Bismuth, electrolytic determination,—IV, 58.
— metallurgy,—I, 186.
— solutions, electrolysis of,—V, 114.
— subnitrate, arsenical,—III, 396.
— volumetric estimation,—I, 326.
— volumetric estimation as oxalate,—IV, 469.
Bleaching powder and analogous substances, constitution,—V, 467.
Blood, oxidation in,—V, 145.
Boiling points and specific volumes, relations between,—V, 70.
— determination,—V, 356.
Boneset and strychnine, relations,—I, 370.
Boracic acid determination,—IV, 279.
Borax, production and use,—I, 359.
Boric acid determination,—IV, 279.
— separation and determination,—IX, 12; X, 154.
Borneol, preparation from camphor,—V, 270.
— reduction of camphor to,—VI, 404.
Boron,—V, 469.
— valence,—II, 77; III, 152.
Böttger, R. Obituary note,—III, 457.
Bread, manufacture,—II, 143.
Brick, manufacture,—II, 417.
British Association, papers read before the Chemical Section,—I, 298.
Brodie, B. C. Obituary note,—II, 439.
Bromacetone, action of ammonium sulphocyanide on,—X, 213.
a-Bromacrylic ether, action of sodium malonic ether on,—IX, 119.
Bromcinnamic acids, contributions to our knowledge of Glaser's two,—IX, 379.
a and β-Bromcinnamic acids' ethers of,—IX, 379.
Bromcitraconic acid, behavior towards aniline,—IX, 191.
a-Bromcrotonic acid,—II, 15.
β-Bromcrotonic acid,—II, 12.
Bromcymenesulphonic acid,—V, 159.
β-Bromdichloracrylic acid,—VI, 167.
Bromdichloracrylic acid,—IX, 6.
Index of Subjects.

Bromethylbenzoylecgonine,—X, 147.
Bromethylidenebromide, action of sodium ethyl oxide on,—V, 192.
Bromfumaric acid, behavior towards aniline,—IX, 187.
Bromine, action on anhydropropionyl phenylenediamine,—VI, 172.
  — action on silver bromide, chloride, and iodide,—VI, 352.
  — and chlorine, separation,—VII, 129.
  — and iodine, separation,—VII, 249.
  — at high temperatures,—II, 78.
  — chlorine and iodine, estimation by electrolysis of silver salts,—VIII, 421.
  — determination by electrolysis,—IV, 22.
  — determination of chlorine in presence of,—IV, 400.
  — estimation in the presence of both chlorine and iodine,—VI, 352.
  — iodine, and chlorine, detection,—VI, 346.
  — manufacture,—I, 441.
Brommaleic acid, behavior towards aniline,—IX, 185.
Brommetatoluic acid,—III, 431.
Bromparathyltoluene, oxidation,—I, 138.
β-Bromtetrachlorpropionic acid,—VI, 155.
Bromtoluenes, oxidation with potassium ferricyanide,—V, 102.
Bromtrichlorpropionic acid,—IX, 1.
Brucine, alleged transformation into strychnine,—VI, 73.
Brucite from Berks Co., Pa.,—V, 281.
Building materials,—II, 417.
Burette, apparatus for filling,—IX, 141.
Butines, notes on,—X, 430.
Butter and cheese, manufacture,—II, 145.
  — oleomargarine, etc., method of analysis,—X, 322.
  — testing of,—II, 203.
Buttery analysis, methods,—I, 366; IX, 60.
Butyl alcohol, decomposition by zinc chloride,—II, 24.
Butyrates and propionates, acid,—VIII, 343.

C

Cacodylic acid, action on the animal economy,—VIII, 128.
Cadmium and copper, separation,—II, 42; III, 229; VII, 134.
  — detection in the presence of copper,—IV, 470.
  — electrolytic determination,—I, 362; IV, 58.
  — electrolytic separation and estimation,—II, 41.
  — iodide,—V, 235.
  — nitrate, basic,—IX, 304.
  — nitroprusside,—X, 222.
Index of Subjects.

Cadmium-benzene-sulphonate,—X, 136.
Caesium and rubidium compounds, extraction from Hebron lepidolite,—VI, 74.
    — and rubidium, metallic,—III, 456.
Caffeine, researches on,—V, 66.
Calcite, artificial production,—IV, 316.
Calcium acid phosphate,—I, 360.
    — and zinc, alloys,—X, 70.
    — chloride,—I, 360.
    — chloride, use in extracting sulphur from its ores,—VI, 65.
    — dissociation,—II, 77.
    — hydroxide, determination of nitrogen by combustion with,—VI, 62.
    — separation from strontium,—V, 121.
Calculus found in a deer, analysis,—I, 210.
Calico printing,—II, 266.
Camphor, method of preparing borneol from,—V, 270.
    — reduction to borneol,—VI, 404.
Camphoric acid, new salts of,—X, 233.
Candles, manufacture,—III, 60.
Cane sugar, specific heat of,—II, 374.
Cantharidine derivatives, relations to the ortho series,—I, 214.
Carbazol and pyrrol, relations between,—X, 440.
Carbon, combined, determination in steel and cast iron,—VI, 287.
    — combined, in iron and steel,—VI, 286.
    — estimation of minute quantities,—V, 458.
    — in phosphorus, estimation of,—VI, 153.
    — in phosphorus, historical note on,—VI, 72.
    — in waters, estimation,—I, 285.
    — rapid filtration in steel analysis,—I, 368.
Carbon bisulphide, determination,—III, 70.
    — hydrated,—V, 15.
    — solidification,—V, 146.
    — uses,—I, 442.
Carbon dioxide, use of liquid,—IV, 407.
Carbonic acid,—V, 69.
    — collection and preservation for future estimation,—IV, 57.
    — estimation in beer,—IX, 290.
    — ethers of,—II, 435.
    — proportions in the higher regions of the atmosphere,—IV, 71.
Carbonic acid in air,—IV, 298.
    — absorption tubes for estimating,—VIII, 315.
    — apparatus for estimating,—VIII, 190.
    — estimations,—IX, 64.
Carbonic oxide, detection,—II, 70.
    — modification of Noack's method of preparation,—V, 43.
Carbon monoxide, action of ozone on,—I, 373.
Index of Subjects.

Carbon monoxide, conduct towards moist phosphorus and air,—IV, 454; V, 424.
— determination,—VII, 143.
— poisoning by,—III, 70.
Carboxytraronic acid and the structural formula of benzene,—III, 154.
Cassiterite from Irish Creek, Va.,—VI, 185.
Cast iron, steel and wrought iron, relative oxidability of,—V, 144.
Castor oil, density and refractive index,—X, 399.
Catalpin: a bitter principle,—X, 328.
Caucasian petroleum, nature of,—II, 360.
Cell nucleus and its relation to urea,—V, 222.
Cellulose, fermentation of,—V, 72.
Cements,—II, 420.
— hydraulic,—II, 480.
Cerite metals, chemistry of,—V, 300.
Chemical action in a magnetic field,—III, 157; VI, 430.
— relation to temperature,—III, 203.
"Chemical Composition of Steel Rails" (C. B. Dudley), review,—I, 205.
Chemical constitution, rotary polarisation of compounds in reference to,—VI, 356.
— relation of antiseptic power to,—VII, 62.

Chlorine, bromine and iodine at high temperatures,—II, 78.
— detection,—VI, 346.
— detection and determination,—IV, 400.
— estimation in the presence of one another,—VI, 352.
— indirect estimation by electrolysis of silver salts,—VIII, 421.
— quantitative separation,—I, 287.
Chloriodosalicylic acid, salts of,—VIII, 96.
Chlorite from Albemarle Co., Va., analysis,—VII, 181.
Chlorometatoluic acid,—III, 430.
Chlorobromide of lead,—III, 52.
Chloroform, manufacture,—I, 446.
— post-mortem detection,—VIII, 358.
Chlornitrophenol,—II, 258.
Chloropal from Lehigh Co., Pa.,—V, 277.
Chlorostannic acid,—I, 304.
Chlortoluic acid,—III, 430.
Chlortri brompropionic acid,—IV, 104.
— decomposition by alkaline hydrates,—V, 255.
Chrome iron ore, determination of chromium in,—III, 163.
Chromic acid, test for,—VII, 250.
— volumetric estimation in chromates and bichromates,—V, 216.
Chromic superfenuoride, action on benzoic acid,—VII, 343.
Chromium and mercury, salts of,—III, 351.
— camphorate,—X, 234.
— detection and estimation,—I, 364.
— determination,—IV, 472.
— determination in chrome iron ore,—III, 163.
— estimation in the presence of organic matter,—V, 41.
— extraction from iron ores,—VIII, 437.
— phosphate,—IV, 471.
— preparation of metallic,—I, 70.
Index of Subjects.

Chromium, salts of,—III, 351.
— separation of vanadium from,—VII, 349.
Cinchonine, decomposition by sodium ethylate,—VII, 182.
Cincinnati Chemical Society, organization,—II, 440.
Cinnamic acid, synthesis,—V, 205.
— ether, action of sodium acetacetic ether on,—IX, 117.
Citraconic acid, behavior towards aniline,—IX, 198.
— behavior towards secondary and tertiary aromatic amines,—IX, 193.
Citraconic ether, action of sodium acetacetic ether on,—IX, 118.
Citric acid, titration with potassium permanganate,—III, 201.
Clothing, materials and processes connected with,—II, 259.
Coal, condition of sulphur in,—IV, 8.
Coal tar distillation, applications of the products,—V, 132.
Cobalt and nickel, separation,—III, 230; VII, 134.
— delicacy of test for,—I, 211.
— detection of minute quantities,—I, 362.
— electrolytic deposition,—III, 230.
— electrolytic determination,—IV, 57.
— malleable,—I, 208.
— metallurgy,—I, 184.
— nitroprusside,—X, 223.
— separation from nickel,—IV, 471.
— volumetric determination,—II, 201.
Cobalt-benzene-sulphonate,—X, 139.
Cocaine, higher homologues of,—X, 145.
Cochineal as an indicator in determining ammonia,—VI, 61.
Coke, occlusion of gases by,—IV, 409.
Colliery explosions,—III, 298.
Coloring matter, new vegetable,—III, 22.
Coloring matters, artificial,—II, 262.
Columbates, methods of analysing,—V, 44, 73.
Columbite and tantalite, methods of dissolving in fluorhydric acid,—V, 50.
Columbite, orthite, and monazite from Amelia Co., Va.,—IV, 138.
Complex inorganic acids,—I, 1, 217; II, 217, 281; III, 317, 492; IV, 377; V, 361, 391; VII, 209, 313, 392; VIII, 289.
Conine, constitution,—II, 171.
Conservatism in chemistry,—I, 372.
Constitution of organic bodies in relation to their density and power to transmit light,—II, 352.
Copper, allotropic, formation and composition,—III, 354.
— and silver, relation of atomic weights,—X, 182.
— and zinc, solubility of the sulphides in melting potassium sulphide,—VII, 144.
— antimonide, occurrence in nature,—X, 60.
— atomic weight,—X, 187.
— deposition on iron in a magnetic field,—III, 157.
Index of Subjects.

Copper, electrolytic determination,—III, 354; IV, 58.
— improved apparatus for precipitating by electrolysis,—VI, 333.
— metallurgy,—I, 187.
— phthalate,—III, 30.
— separation from cadmium,—II, 42; VII, 134.
— separation from zinc,—V, 122.
— slag, analysis,—VIII, 429.
— specific heat,—II, 374.
Cork stoppers, oxidation of,—V, 68.
Corn, chemical composition as influenced by environment,—VI, 302.
Correspondence. Subsection of chemistry at Saratoga,—I, 291.
Corundum from Lehigh Co., Pa.,—V, 275.
Coto bark and its constituents,—I, 454.
Cotton-seed oil, density and refractive index,—X, 395.
Crafts, J. M. Prize from French Academy,—II, 79.

D

Cresol, from oxytoluic acid,—I, 114.

Dactylis geomerata, analysis of,—IV, 18.
Dehydrobenzoylacetic acid,—VIII, 101.
Densities of gases at high temperatures,—II, 98.
— and refractive indices of certain oils,—X, 392.
Density, vapor, of some inorganic bodies,—I, 213.
Deuteroalbumose,—VI, 46.
Deville, St. Claire. Obituary note,—III, 457.
— Resignation from the Ecole normale of Paris,—II, 79.
Deweylite from Berks Co., Pa.,—V, 280.
Dextrin,—VI, 70.
Index of Subjects.

Dextrose,—VI, 69,
 — and levulose, constitution,—VIII, 291.
Diamide or hydrazine, discovery,—IX, 309.
Dianiline silicotetrafluoride,—X, 171.
Diastase, influence of amount on rate of conversion,—VII, 312.
Diastatic action, determination,—VII, 306.
 — influence of acids and alkalies on,—VII, 309.
 — influence of time on,—VII, 310.
 — of saliva,—III, 305.
Diazobenzene, conduct of salts towards alcohol,—IX, 387.
 — decomposition of salts in toluene,—IX, 392.
Diazocompounds, decomposition in formic and acetic acids,—X, 368.
 — decomposition with alcohol,—VIII, 243; IX, 387.
Diazoo-sulphobenzoic acid,—IX, 415.
Diazotoluences, conduct of salts towards alcohol,—IX, 394.
Dibenzoylacetic acid,—VII, 257.
Dibenzoylmethane,—VII, 261.
Dibenzylidimethylammonium chloride,—IX, 80.
Dibromacrylic acid,—III, 113, 172; IV, 169.
 — and tribrompropionic acids, relations between,—IV, 176.
αβ-Dibrombutyric ethyl ether, behavior towards alkalies,—IX, 280.
β-Dibrom dichlorpropionic acid,—VI, 165.
Dibromiodacrylic and chlorbromiodacrylic acids,—IV, 92.
Dibrommaleic acid,—III, 98.
 — behavior towards aniline,—IX, 189.
Dibromoxanilide, nitro-derivatives,—IX, 361.
Dibrompyroxanthin,—III, 337.
Dibrompyroxanthintetram bromide,—III, 336.
Dibromstyrol,—V, 385.
Dichloracrylic acid,—III, 167.
 α-Dichloracrylic acid, crystalline form,—IV, 174.
 αβ-Dichlor butyric acid, behavior towards alkalies,—IX, 283.
 α-Dichlor brompropionic acid,—IV, 267.
β-Dichlort dibrompropionic acid,—IV, 270.
Dichlordiethoxy amido pyridine,—VIII, 396.
Dichlormdioxyamidopyridine,—VIII, 391.
Dichloroethox yamidopyridine,—VIII, 396.
Didimethylamine silicotetrafluoride,—X, 177.
Didymium, atomic weight,—IV, 76; V, 300.
 — oxide, quantitative estimation in mixtures with earthy oxides,—V, 80.
Diethylacetoacetate, action of phosphorus pentachloride on,—IV, 27.
Diethylamine-benzene-sulphonate,—X, 132.
Diethylamine-paratoluene-sulphonate,—X, 142.
Diethylamine uranate,—X, 220.
Diethylhydrobenzdiamidobenzene hydroxide,—V, 419.
Diethylbenzoylacetic acid,—VII, 165.
Index of Subjects.

Diethylorthotoluidine,—VII, 119.
Diethyloxybutyric acid,—III, 393.
—— action of hydriodic acid on,—III, 394.
—— action of hydrobromic acid on,—III, 395.
—— action of phosphorus pentachloride on sodium salt,—III, 392.
Difluorbenzoic acid,—VII, 346.
Digestibility of fish flesh in gastric juice,—VI, 318.
Digestion, gastric,—III, 360.
—— salivary,—III, 221.
Diiodobromacrylic and chlorbromacrylic acids,—III, 124.
Dimethylacetel,—V, 260.
Dimethylamine-benzene-sulphonate,—X, 131.
Dimethylamine-paratoluene-sulphonate,—X, 141.
Dimethyamine uranate,—X, 220.
Dimethyluric acid,—II, 305.
β-Dinitroparabromphenetol,—III, 185.
Dinitroparadibrombenzols and derivatives,—III, 184.
Dinitrophenylmercaptan,—VIII, 90.
Dinitrophenylsulphide,—VIII, 91.
Dinitrosulphocyanbenzene,—VIII, 89.
Diorthonitroparamidophenol,—V, 33.
Dioxyamidopyridine,—VIII, 377.
Dioxybenzoic acid,—II, 197.
Diparachlorbenzylamine,—II, 93.
Diparachlorbenzylsulphone,—II, 166.
Diparaiodbenzylamine,—II, 256.
Diphenylamine-benzene-sulphonate,—X, 135.
Diphenylamine-paratoluene-sulphonate,—X, 143.
Diphenyl sulphone,—IX, 68.
Dipropylacetic acid,—III, 389.
Dipropyl acetoacetate, action of sodium amalgam on,—III, 391.
Dipropyl acetone,—III, 390.
Dipropylbetaoxybutyric acid,—III, 391.
Dipropylethyl acetoacetate, preparation,—III, 386.
Dipyridine silicotetrafluoride,—X, 294.

"Discovery of the Periodic Law, and on Relations among the Atomic
Weights" (J. A. R. Newlands), review,—VI, 142.

Disinfectants,—II, 425; IV, 324.
Distillation, fractional, apparatus for,—X, 62.
—— in a vacuum, fractional, apparatus for,—X, 362.
Distillations, apparatus for quantitative,—IX, 23.
Distilled spirits, manufacture,—II, 149.
Disulphaminebenzoic acid,—II, 186.
Disulphobenzoic acid,—II, 188.
Draper, J. W. Obituary note,—III, 456.
Drying oils, fatty acids of,—X, 57.
Index of Subjects.

Dumas, J. B. A.  Obituary note,—VI, 215.
Dyeing,—II, 266.
Dyestuffs, preparation,—II, 261.
Dysalbumose,—VI, 107.

E

Earth metals in samarskite,—IV, 327.
Electrolysis, new results in,—I, 329.
 —— of molybdenum solutions,—VII, 90.
 —— unusual case of,—I, 438.
Electrolytic estimations and separations,—VIII, 206.
 —— method as applied to iron,—X, 330.
Electrometallurgy,—I, 201.
Elementary analysis, absorption apparatus for,—VI, 353.
Elements, discussion of working hypothesis that they are compounds,—I, 10.
 —— genesis of,—IX, 232.
 —— new, position in natural system,—III, 454.
“Elements of Chemistry” (E. J. Houston), review,—VI, 136.
“Elements of Modern Chemistry” (A. Würtz), review,—VI, 134.
“Elements of Physiological and Pathological Chemistry” (T. C. Charles), review,—VIII, 291.
Elliott’s gas apparatus, improved form,—IX, 294.
Equivalents, apparatus for determining,—VI, 347.
 —— simple method of determining,—X, 73.
Etched figures and arrangement of atoms,—VIII, 222.
Ether, luminous incomplete combustion of,—IV, 317.
 —— manufacture,—I, 446.
Ethers, unsaturated, addition of sodium acetacetic ether to,—IX, 112.
Ethoxymetatoluic acid,—IV, 374.
Ethyl acetate, speed of saponification,—III, 340.
 —— acetoacetate, propyl derivatives and decomposition products of,—III, 385; IV, 27.
Ethyl alcohol, condensation compounds of benzil with,—VII, 16.
 —— decomposition by zinc chloride,—II, 22.
 —— manufacture,—I, 446.
 —— specific heat,—II, 374.
Ethyl aldehyde, action on orcin and resorcin,—V, 349.
 —— action of potassium salts on,—V, 186.
 —— action of sodium salts on,—V, 189.
 —— action of zinc chloride on,—V, 184.
 —— formation of crotonic and β-oxybutyric aldehydes from,—V, 182.
Ethylamine-benzene-sulphonate,—X, 132.
Index of Subjects.

Ethylamine-paratoluene sulphonate,—X, 142.
Ethylamine uraamate,—X, 220.
Ethylhydrobenzodiamidobenzene,—V, 421.
Ethyl benzoate, action of phosphorus pentachloride on,—IX, 213.
Ethylbenzoylecgonine,—X, 146.
Ethyl bromide, use,—I, 446.
Ethyl cinnamate, action of sodium malonic ether on,—IX, 114.
Ethyl cyanide, constitution of the addition product with chlorhydric acid,—VII, 71.
Ethyl diacetic acid in urine,—I, 365.
Ethylene, action of heat on,—VIII, 362.
—— changes effected by heat in the constitution,—VIII, 153.
Ethylene bromide, action on the sodium derivatives of the ethers of acetoacetic acid, etc.,—X, 446.
Ethylene, liquefied, use in producing low temperatures,—IV, 237.
Ethylbenzoylacetate, action of phosphorus pentachloride on,—VII, 268.
—— condensation with benzaldehyde,—VII, 271.
—— reduction of,—VII, 265.
Ethylbenzoylnitrosoacetate,—VII, 254.
Ethylbenzoylsuccinate,—VII, 368.
Ethyl dibenzoylsuccinate,—VII, 357.
Ethyl iodide, action on potassium para-mido-benzoate,—VII, 198.
Ethyl mustard oil, formation,—I, 416.
Ethylorthotoluidines,—VII, 118.
Ethyl-paratoluene sulphanide,—VIII, 241.
Ethyl phthalate,—I, 413.
“Etudes de Dynamique Chimique” (J. H. van’t Hoff), review,—X, 161.
Eupatorium and strychnine, relations,—I, 370.
Evaporation of corrosive liquids, removal of obnoxious vapors in,—VI, 144.
—— without fusion,—III, 153.
Explosive agents,—II, 423.
—— ice,—VII, 428.
Extraction of solids by a volatile solvent,—VIII, 73.
Eyster’s scheme for qualitative analysis,—VII, 110.

F

Fat in milk, Marchand’s method for determining,—VII, 238.
Fats and oils, examination of,—VI, 285.
—— notes on the HübI method of examining,—VI, 416.
Fatty acids of the drying oils,—X, 57.
Fatty series, syntheses by means of aluminium chloride,—X, 75.
Feeding-stuffs, composition and digestibility,—VIII, 47.
Ferric camphorate,—X, 234.
Index of Subjects.

Ferric oxide, specific heat,—II, 374.
— solutions, reduction,—IV, 282.
— sulphate, action on iron,—IX, 90.
Ferricyanide of potassium, oxidation of benzene derivatives with,—V, 97;
    VII, 145; VIII, 176; IX, 93; X, 472.
Ferrocyanide of potassium, manufacture,—I, 358.
Ferrous chloride, vapor density of,—VI, 210.
— sulphate, preservation of,—V, 122.
Filtering apparatus, simple, portable, quick,—IX, 142.
Filtration balance,—IV, 476.
— device for filtration of carbon,—I, 368.
— hot, with Bunsen pump,—III, 296.
— reverse, simple arrangement for,—IX, 143.
— with easily soluble and volatile filters,—VII, 87.
Fire damp in mines, detection,—I, 365.
First work in pure chemistry in America,—VII, 356.
Fish, chemistry of,—IX, 421; X, 1.
— flesh, digestibility in gastric juice,—VI, 318.
Flashing point of petroleum,—IV, 285, 293; VI, 18.
— forms of apparatus for determining,—V, 459.
Flavoring essences, artificial,—II, 150.
Flour,—VI, 393.
Fluoride of silicon, action on aniline,—X, 166.
— action on organic bases,—X, 165.
Fluorine, atomic weight,—IX, 461.
— free,—III, 300, 301.
— isolation,—VIII, 445.
— volumetric determination,—I, 27.
Fluorite from Lehigh Co., Pa.,—V, 272.
Fodders, sugars and starch in, and their determination,—X, 49.
Food, influence on proportions of albuminoids in cow's milk,—VII, 247.
— material used as,—II, 143.
"Foreign Phosphates" (Shepard), review,—I, 207.
Formic acid, synthesis,—II, 76.
Foundations of chemistry,—X, 333.
Fractional distillation, apparatus for,—VI, 178; X, 62.
— in a vacuum, apparatus for,—X, 362.
Freezing mixture,—X, 45.
Fruits, southern, analysis with reference to their food values,—X, 487.
Puchsine test for ammonia,—IV, 402.
— for nitric acid,—IV, 403.
Fuel and arrangements for artificial production of heat,—I, 60.
Fumaric acid, behavior towards aniline,—IX, 184.
Fumaric and maleic acids, anilides of,—IX, 235.
— isomerism,—IX, 253.
Index of Subjects.

Fumarimide, constitution,—IX, 252.
Funnel support,—VIII, 76.
Furfurol and derivatives,—III, 33, 98, 165.
— product of dry distillation of wood,—III, 34.
Fusel oil, detection and estimation,—IV, 295.

G

Gallic acid, test for,—II, 48; IV, 403.
Gallisin, an unfermentable substance in starch and sugar,—VI, 214.
Gallium in American blends,—II, 44.
— separation from other metals,—IV, 236.
Garnet from Lehigh Co., Pa.,—V, 276.
Gas absorption and measuring tube,—VII, 429.
— analysis, apparatus,—I, 105.
— apparatus, improved form,—X, 53.
— generator,—V, 143.
— illuminating,—III, 63.
— receiver for use in gas analysis,—IX, 418.
— regulator,—III, 378; IV, 155.
— volumes, apparatus which facilitates the correct reading of,—VII, 58.
Gases, apparatus for measuring and analysing,—VIII, 9.
— occluded by aluminium and magnesiu—,—II, 151.
— occluded by coke,—IV, 409.
— relative densities at high temperatures,—II, 98.
— transmission through fluids of different densities,—IV, 235.
Gastric digestion,—III, 360, 441; IV, 214, 461.
Gastric juice, digestibility of fish flesh in,—VI, 318.
— influence on diastatic action of saliva,—III, 305.
Geissler, H. Obituary note,—I, 74.
Genesis of the elements,—IX, 232.
Genthite from North Carolina, analysis of,—X, 44.
Germanium, discovery, etc.,—IX, 71.
— compounds of,—X, 245.
Germano-fluoride of potassium,—IX, 385.
German silver,—I, 199.
Gersdorffite, cobaltiferous,—I, 323.
Glaser's two monobromcinnamic acids,—IX, 379.
Glass, manufacture of,—II, 62.
Glaucnite,—VI, 412.
Glucinum, atomic weight,—II, 360, 435; VI, 215.
Glucose,—I, 452.
— in urine, value of Brücke's method of testing for,—VIII, 139.
— report on the manufacture,—VI, 137.
— volumetric determination,—I, 367.
Index of Subjects.

Glucoside group, synthetical researches in,—V, 171; VI, 336.
Glue and other cements,—II, 420.
Glutazine or dioxyamidopyridine,—VIII, 377.
Gluten determinations, time element in,—VI, 402.
Glyceroborates of calcium and sodium as antiseptics,—IV, 317.
Glycocholic ether,—I, 181.
Glycogen,—VI, 195.
Gold, metallurgy,—I, 195.
Gooch crucible,—I, 319; III, 297.
Gooch method of separating and treating precipitates,—I, 317.
Grape sugar crystallised from water,—IV, 239.
— estimation with standard solutions,—IV, 296.
Graphite from Ducktown, Tenn.,—II, 331.
Grasses, composition of American,—IV, 16.
Grenade, analysis of a hand fire,—X, 46.
Guaicol-glucoside,—VI, 339.
Guanidine, reactions for,—IX, 220.
Gum lac from Arizona,—II, 34.
Gummite,—I, 89.

H

Haemoglobin, molecular weight and formula,—V, 148.
Halogen compounds of lead,—X, 229.
— organic compounds, analysis,—I, 286.
Halogens contain no oxygen,—III, 379.
— determination in chlorates, bromates and iodates,—III, 69.
— determination in the side chains of aromatic hydrocarbons,—VI, 351.
— estimation in volatile organic compounds,—V, 211.
— in aromatic compounds, note on the Schulze process of determining,—VI, 415.
"Handbuch der organischen Chemie" (F. Beilstein), review,—II, 346.
Hay and fodders, determination of albuminoids in,—II, 81.
Haydenite,—VI, 24.
Heat, artificial production,—III, 58.
Heintz, W. Obituary note,—II, 440.
Helicin and phenolglucoside, synthesis of,—I, 305.
Helvite from Amelia Co., Va.,—IV, 478.
Heptane, bromination,—X, 237.
— from Pinus sabini ana,—I, 155; VI, 28.
Heptylene, action of chlorous acid upon,—X, 225.
Heteroalbumose,—VI, 101.
Heulandite,—VI, 412.
Hexametaphosphomolybdates,—VII, 406.
Hexane, decomposition by heat,—VIII, 3.
Hubner, H. Obituary note,—VI, 431.
Hydrazine, discovery,—IX, 309.
Hydrazine-ortho-toluene-sulphonic acid,—IX, 401.
Hydrazine-sulphobenzoic acid,—IX, 417.
Hydrazinetoluene sulphonic acids, action of concentrated sulphuric acid on, —VIII, 271.
Hydrocarbons, solid, occurrence in plants,—X, 439.
Hydrochloric acid, aqueous, coefficients of volatility,—X, 458.
—— detection,—II, 48.
—— gas, preparation,—III, 68.
—— manufacture,—I, 278.
Hydrocyanic acid, simultaneous oxidation and reduction with,—VII, 189.
Hydrofluoric acid, electrolysis of,—VIII, 445.
—— molecular weight,—III, 189.
Hydrogen,—IV, 400.
—— and oxygen, relative values of atomic weights,—X, 81, 191.
—— combustion of weighed quantities and atomic weight of oxygen,—X, 249.
—— determination of free,—II, 67.
—— explosion with oxygen,—I, 284.
—— manufacture,—I, 445.
—— nascent,—IV, 482.
—— new lines in the spectrum of,—II, 77.
—— occlusion by copper,—I, 285.
—— photograph of the spectrum,—I, 72.
—— purification,—II, 67.
—— separation from marsh gas and nitrogen,—I, 284.
Hydrogen dioxide, action on organic matters and fermentations,—IV, 323.
—— detection of,—VI, 355.
—— estimation,—I, 286.
—— in air, estimation,—III, 68.
—— in analytical chemistry,—V, 212.
—— in surgery,—IV, 323.
—— volumetric determination,—II, 199.
Hydrogen sulphide, action on arsenic acid,—X, 459.
—— apparatus,—IX, 143.
—— generator,—IV, 401; IX, 143.
—— preparation in chemico-legal examinations,—I, 68.
—— preparation,—I, 287; II, 68.
—— qualitative analysis without,—VII, 21.
—— removal of arsine from,—IX, 386.
—— substitution of ammonium hyposulphite for, in qualitative analysis,—V, 215.
—— test for,—V, 456.
Hydrogen superoxide in the air, estimation,—III, 68.
Hydroxy-benzoic acids, action of phosphorus pentachloride on the three isomeric,—X, 296.
Hydroxyl, quantitative determination,—IX, 82.
Hydroxyl-sulphobenzoic acid,—IX, 415.
Index of Subjects.

Hypochlorite of sodium, action on nitrogen compounds,—I, 286.
Hyponitrous acid, preparation and basicity,—IV, 322.
Hypophosphomolybdates,—V, 361.
Hypophosphotungstates,—V, 364.
Hyposulphurous acid, determination,—I, 288.

Ice, explosive,—VII, 428.
Illuminating gas, estimation in the air,—V, 123.
—— manufacture,—III, 63.
India rubber, gutta-percha, etc.,,—II, 267.
Indicators used in alkalimetry, comparative study of,—V, 458.
Indigo, Baeyer’s method of synthesis,—II, 438.
—— artificial,—III, 282; IV, 67.
Indium chloride, vapor density and formula,—I, 213.
Industrial chemistry, reports,—I, 58, 184, 273, 356, 440; II, 62, 143, 259, 417; III, 58, 139; IV, 392, 383; V, 52.
Ink, manufacture,—III, 143.
“Inorganic Chemistry” (V. von Richter), review,—VI, 135.
Inosite,—IX, 74.
Intermolecular rearrangement, cases of,—V, 203.
Intestines, digestion in,—IV, 214.
Iodobromacrylic acid,—III, 175.
Iodic acid, behavior as an indicator,—VI, 341.
Iodide of nitrogen,—I, 4.
—— of potassium, lead in,—I, 71.
—— of potassium, removal of iodate from by means of zinc amalgam,—X, 321.
Iodine, action on silver bromide, chloride and iodide,—VI, 352.
—— and bromine, separation,—VII, 249.
—— and chlorine, separation by a dry method,—VI, 352.
—— bromine and chlorine, detection,—VI, 346.
—— bromine and chlorine, estimation by electrolysis of silver salts,—VIII, 421.
—— density at high temperatures,—II, 78.
—— detection and determination in presence of chlorine and bromine,—II, 199; IV, 400.
—— detection in bromine,—III, 68.
—— determination in a mixture of chlorides, bromides and iodides,—VI, 353.
—— estimation in the presence of both chlorine and bromine,—VI, 352.
—— manufacture,—I, 440.
—— monochloride, action on aromatic amines,—I, 255.
—— oxygen acids of,—IX, 145.
—— solutions, standard, preparation using neutral potassium chromate,—VI, 353.
Index of Subjects.

Iodine, vapor density,—II, 108, 175; III, 72.
— volumetric determination,—II, 68.
Iridio-platinum,—I, 200.
Iridium phosphides,—V, 231.
Iron, action of ferric sulphate on,—IX, 90.
— amalgam,—I, 70.
— and copper sulphates, manufacture,—I, 361.
— and steel castings, processes for direct coppering,—IV, 157.
— and steel, manganese in,—IX, 58.
— and titanium, separation,—VII, 294.
— combined carbon in,—VI, 286.
— conduct towards nitrogen,—III, 134.
— determination by potassium permanganate,—V, 459.
— determination of phosphorus in,—VII, 296.
— determination of silicon in,—I, 147.
— electrolytic determination,—IV, 58; X, 330.
— electrolytic separation from aluminium,—IV, 59.
— electrolytic separation from manganese,—IV, 58.
— ingot, manufacture from phosphoric pig iron,—IV, 228.
— in hydrochloric acid solutions, determination,—IV, 359.
— metallurgy of,—I, 62.
— ores containing phosphoric and titanic acids, analysis of,—IV, 1.
— precipitation by ammonium succinate,—III, 231.
— pyrites, nitric acid sp. gr. 1.42 as a solvent for,—IV, 402.
— separation as basic acetate,—I, 251.
— specific heat,—II, 374.
Isoamyl alcohol,—VI, 244.
Isoamylamine-benzene sulphonate,—X, 133.
Isobutyl alcohol, decomposition by zinc chloride,—II, 23.
Isobutylamine-benzene sulphonate,—X, 133.
Isobutylamine uranate,—X, 221.
Isobutylbenzoyl cecgonine,—X, 148.
Isobutylene, action of bromine on,—IX, 87.
Isobutyric acid, action on aniline,—VII, 116.
Isocyranates, conversion into mustard oils,—VI, 257.
Isohexane, decomposition by heat,—VIII, 6.
Isomerism, a possible new kind of,—IV, 60.
Isophthalic sulphinide,—III, 209.
Isopicraminic acid,—V, 20.
Isoxylene, trinitro-, from American petroleum,—II, 437.
Itaconic acid, behavior towards aniline,—IX, 199.
— behavior towards secondary and tertiary aromatic amines,—IX, 193.
Index of Subjects.

J
Jamesonite,—I, 325.
Jarosite from a new locality,—II, 375.

K
Kalinite from Sevier Co., Tenn.,—VI, 97.
Kaolinite, analysis of a variety from Nelson Co., Va.,—VII, 178.
Kerosene oils, safety of,—X, 356.
Kjeldahl’s method of determining nitrogen, apparatus for,—VIII, 323.
Kolbe, H. Obituary note,—VI, 431.
Kunys,—VIII, 200.
"Künstliche organische Farbstoffe" (E. Noelting and P. Julius), review,—IX, 457.

L
Lactose in milks, determination by optical methods,—VI, 289.
Lamps, materials for burning in,—III, 62.
Landolt, H., appointment to chair of chemistry in the Agricultural College of Berlin,—II, 78.
Lanthanum, atomic weight,—IV, 76.
Lard oil, density and refractive index,—X, 399.
Laurent’s polariscope, graduation of,—VIII, 72.
Lead, action of vegetable acids on,—IV, 440.
—— bromiodide,—X, 232.
—— bromosulphocyanide,—X, 230.
—— chlorobromide,—III, 52.
—— chlorobromiodide,—X, 232.
—— chlorocyanide,—X, 231.
—— chlorosulphocyanide,—X, 229.
—— detection of minute quantities,—I, 364.
—— electrolytic determination,—IV, 58.
—— estimation as dioxide,—V, 413.
—— in crystals of potassium iodide,—I, 71.
—— iodosulphocyanide,—X, 230.
—— metallurgy,—I, 189.
—— new halogen compounds of,—X, 229.
—— nitrates, basic,—IX, 299.
Lecture apparatus, quantitative,—V, 353.
"Leçons de Chimie Élémentaire Appliquée aux Arts Industriels" (J. Girardin), review,—II, 214.
Ledoux, A. R., resignation from North Carolina Agricultural Experiment Station,—II, 79.
"Lehrbuch der Allgemeinen Chemie" (W. Ostwald), review,—VII, 281.
Index of Subjects.

"Lehrbuch der Organischen Chemie" (A. Kekulé), review,—III, 440.
Lepidolite, Hebron, extraction of caesium and rubidium from,—VI, 74.
Levulinic and maleic acids, constitution,—IX, 364.
Levulose and dextrose, constitution,—VIII, 291.
— preparation and properties,—IV, 69.
Library bindings, deterioration of,—I, 293.
Liebig monument,—I, 74; VI, 76.
Light, artificial production,—III, 60.
Lime burning,—II, 418.
Linoleic acid,—X, 57.
Liquefied gas, use in producing low temperatures,—IV, 237.
Liquid paraffin, reagent for the detection of water in alcohol, chloroform and ether,—VI, 355.
Lithium picrate,—I, 153.
— reagent for,—VII, 133.
— separation from potassium and sodium,—IV, 59.
— separation from sodium and potassium with amyl alcohol,—IX, 33.
— spectroscopic determination,—VII, 35.
Ludus, sensitiveness as an indicator,—V, 217.
Liver, bile and glycogen,—VI, 195.
Lockyer's hypothesis that the elements are compound bodies,—I, 15.

M

Magnesium and calcium, separation from sodium and potassium,—IX, 49.
— determination,—II, 71.
— occlusion of gases in,—II, 151.
— sensitive reagent for,—I, 362.
— sulphate, manufacture,—I, 360.
Magnetic rotary polarisation of compounds in relation to their chemical constitution,—VI, 356.
Magnetism, influence on chemical action,—VI, 430.
Magnetite, extraction of vanadium from,—VII, 349.
Maleic acid, anilides of,—IX, 235.
— behavior towards aniline,—IX, 183, 197.
— constitution,—IX, 364.
Maleic and fumaric acids, isomerism,—IX, 253.
Maleinil,—IX, 238.
Malic acid, reversal of direction of rotation,—II, 150.
— titration with potassium permanganate,—III, 201.
Malic and tartaric acids, optical properties,—VII, 120.
Manganese amalgam,—I, 70.
— argentan or German silver,—I, 199.
— borate,—IV, 358.
— camphorate,—X, 233.
Index of Subjects.

Manganese compounds with fluorine,—IX, 460.
— determination,—I, 363.
— electrolytic determination,—IV, 58.
— electrolytic separation from iron,—IV, 58.
— higher chlorides of,—IX, 459.
— higher oxides and acids corresponding to them,—X, 240.
— in steel and iron,—IX, 58.
— mineral, new,—III, 420.
— separation and determination,—II, 73.
— sesquioxide, compound with cupric oxide,—IX, 269.
— sulphide, solubility in melting potassium sulphide,—VIII, 436.
— tetroxide,—IX, 459.
— trioxide,—IX, 458.
— volumetric determination,—V, 290.

Manganese-benzene-sulphonate,—X, 137.

Manganous-aluminic sulphate from Sevier Co., Tenn.,—VI, 97.

Marsh-Berzelius method for the detection of arsenic, quantitative efficiency,—VII, 338.

Matches, manufacture,—III, 65.

Material for standard weights and measures,—I, 67.

Measures, standard, material for,—I, 67.

Meat, extracts,—II, 144.
— preserving,—II, 144.

"Medical Student's Manual of Chemistry" (R. A. Witthaus), review,—V, 466.

Medina sandstone, analysis,—X, 224.

Melting point, determinations,—V, 357.

Melting points, mercury thermometers with reference to the determination of,—V, 307.

Menacconite,—VI, 413.

Mercuric camphorate,—X, 234.
— compounds, detection,—VII, 355.
— sulphide, action of nitric acid on,—VIII, 75.

Mercurous-benzene-sulphonate,—X, 139.

Mercurous hydrate,—VIII, 426.
— nitroprusside,—X, 222.

Mercury and chromium, salts of,—III, 351.
— apparatus for purification of by distillation in a vacuum,—VII, 60.
— detection,—III, 230.
— metallurgy,—I, 190.
— purification,—I, 68, 213, 362.
— specific heat,—II, 374.

Mercury thermometers, use in determining melting and boiling points,—V, 307.

Mesitylene, experiments with,—II, 130.
Index of Subjects.

Mesitylene, note on the oxidation of mono-nitro,—VII, 268.
   —— sulphamide, oxidation,—II, 131.
Mesitylenic sulphinide,—II, 133; III, 216.
Mesolite from Fritz Island, Pa.,—IV, 357.
Metaazoxybenzanilide,—V, 5.
Metabolism,—IV, 465; V, 219.
Metabrombenzaldehyde,—III, 32.
Metabrombenzylibromide,—I, 97.
Metabromtoluene, oxidation,—VIII, 185.
Metachloridosalicylic acid,—VIII, 95.
Metachlornitrosalicylic acid,—I, 179.
Metachlorosalicylic acid, products obtained by nitration,—I, 176.
Metadichloroxanilic acid,—VIII, 353.
Metahydroxybenzoic acid, action of phosphorus pentachloride on,—X, 303.
Metals, new,—I, 452.
Metamerism, two remarkable cases of,—II, 359.
Metamidoparasulphobenzoic acid,—I, 347.
   a-Metamidosalicylic acid,—V, 22.
Metanitroparasulphobenzoic acid,—I, 343.
   a-Metanitrosalicylic acid,—V, 21.
Metanitrotoluene, oxidation,—VII, 149.
Metastasis,—II, 426.
Metasulpho-cinnamic acid,—IV, 167.
Metatoleuesulphamide, oxidation,—IV, 142; VIII, 186.
Meteorite, from Highland Co., Va., analysis of a supposed,—VIII, 427.
Methyl acetate,—V, 260.
   Methyl alcohol,—V, 260; VI, 244.
       —— decomposition by zinc chloride,—II, 21.
       —— uses,—I, 445.
   • Methyl aldehyde, determination,—V, 460.
       —— preparation,—I, 418.
Methylamine-benzene-sulphonate,—X, 130.
Methylamine-paratoluene-sulphonate,—X, 141.
Methylamine uranate,—X, 220.
Methyl arbutin, identity of natural and synthetical,—VI, 336.
       —— synthesis,—V, 176.
Methyl chloride,—I, 445.
       —— production,—I, 72.
Methyl conine, synthesis,—II, 171.
Methylene iodide, action of sodium phenylsulphinate on,—VI, 253.
Methyl formate,—V, 259.
Methyl iodide, action on asparagine,—VI, 419.
       —— action on potassium paramido-benzoate,—VII, 195.
Methyl orange, sensitiveness as an indicator,—V, 217.
Index of Subjects.

Methyluric acid, oxidation,—II, 311.
Microlite from Amelia Co., Va.,—III, 130.
Microzyma cretae,—IV, 453.
Migration of atoms,—I, 420.
Milk analysis,—III, 291; IX, 100.
— determination of fat in, by Marchand's method,—VII, 238.
— digestion in the stomach,—IV, 463.
— estimation of albuminoids in,—VII, 246.
— influence of food on proportions of albuminoids in,—VII, 246.
— sugar, specific rotary power of,—VI, 289.
Mineral, new, from Colorado,—IV, 140.
Minerals from Berks Co., Pa.,—V, 279.
— from Fritz Island, Pa.,—IV, 356.
— from Lehigh Co., Pa.,—V, 272.
Mineral waters, artificial,—II, 150.
Minium, volumetric determination of the value of,—II, 202.
Mirror amalgam, composition,—VIII, 430.
Molecular structure and absorption spectra of carbon compounds,—III, 373.
Molybdenum solutions, electrolysis of,—VII, 90.
Molybdic acid, determination,—IV, 404, 476.
Monazite from Amelia Co., Va.,—IV, 138.
Monobromacetone, action of ammonium sulphocyanide on,—X, 213.
Monobrombenzylbromides, action of water on,—III, 260.
— comparison of the three,—III, 255.
\( \alpha \)-Monobromcinnamic acid,—V, 385.
Monobromcinnamic acids,—IX, 379.
\( \alpha \)- and \( \beta \)-Monobromcrotonic acids,—II, 11.
Monochloracetic acid, action of phosphorus pentachloride on,—IX, 215.
\( \alpha \)-Monochlordinitrophenol aniline,—I, 180.
Monoethylphthalate,—I, 413.
Monometaphosphomolybdates,—VII, 405.
Monometaphosphotungstates,—VII, 401.
Mononitromesitylene, oxidation,—VIII, 268.
Monoparachlorbenzylamine,—II, 94.
Monoparaiodobenzylamine,—II, 257.
Mordants,—II, 265.
Morphine, constitution,—III, 454.
— in opium, determination,—X, 247.
— new series of bases derived from,—IV, 70.
— transformation into codeine and homologous bases,—III, 383.
Mortar and hydraulic cement,—II, 418.
Mosandra,—I, 454.
Mucilage, manufacture,—III, 144.
Mucobromic acetanhydride,—III, 46.
Mucobromic acid, action of dry bromine on,—III, 47.
Index of Subjects.

Mucobromic acid and salts,—III, 39.
— conduct with oxidising agents,—III, 102.

Mucochloric acid,—III, 165.

Mucophenoxybromic acid,—VI, 187.

Mucoxybromic and mucoxychloric acids,—IX, 147.

Mucoxychloric acid,—IX, 159.

Mustard oils, conversion of organic isocyanates into,—VI, 257.

Mustard oil from black mustard, density and refractive index,—X, 397.
— preparation,—IV, 321.

N

Naphthalene, action of phthalic anhydride on,—I, 267.
— derivatives, oxidation of,—V, 106.

Naphthalenesulphamides, oxidation of,—V, 106.

α-Naphthylamine-benzenesulphonate,—X, 135.

α-Naphthylamine-paratoluenesulphonate,—X, 144.

Nesslerising, tube-stand for,—IV, 313.

Nets and sails, methods for the preservation of,—V, 440.

Neutrality, absolute, determination,—VIII, 211.

NH₃, pretended compound,—IV, 315.

Nichols, W. R. Obituary notice,—VIII, 443.

Nickel amalgam,—I, 70.
— and cobalt, determination,—II, 72.
— and cobalt, electrolytic deposition,—III, 230.
— and cobalt, malleable,—I, 208.
— and zinc, separation,—VI, 149.
— camphorate,—X, 235.
— detection in the presence of cobalt,—II, 201.
— electrolytic determination,—IV, 58.
— metallurgy,—I, 184.
— nitroprusside,—X, 223.
— separation from cobalt,—III, 230; IV, 471; VII, 134.
Nickel-benzenesulphonate,—X, 138.

Nickeliferosous talc, analysis of,—X, 45.

Nicotinic acid from pyridine,—III, 456.

Nitrates, determination in waters,—III, 367.
— reduction by ferments,—IV, 452.

Nitre manufacture,—I, 356.

Nitric acid, ammonium ferrous sulphate as a reagent for,—V, 209.
— determination,—II, 69; V, 121; VII, 132; VIII, 274.
— determination as nitric oxide,—I, 289.
— in soils, determination by Schloßing’s method,—IV, 318.
— manufacture,—I, 278.

Nitric and nitrous oxides, experiment showing composition by volume,—VIII, 92.

Nitric oxide, absorbents for,—IV, 403.
— gas from the reduction of nitric acid, estimation,—V, 121.
Index of Subjects.

Nitrification,—III, 73.

— in ammonium chloride solutions,—II, 45.

Nitrile of anhydrobenzdiadamidobenzene,—V, 415.

Nitriles, determination,—IV, 403.

Nitrogen, apparatus for absolute determination,—IV, 42.

— apparatus for determining by the copper oxide method,—VI, 234.

— apparatus for Kjeldahl’s method of determining,—VIII, 323.

— atmospheric, acquisition by plants,—VI, 365.

— atmospheric, liberation from compounds and acquisition by plants,—VIII, 398.

— comparison of the copper oxide and Ruffle methods of determining,—VI, 234.

— determination,—II, 27, 69; IV, 404; V, 216.

— determination by combustion with calcium hydroxide,—VI, 60.

— determination in agricultural products,—I, 77.

— determination with soda-lime, absorption of ammonia in,—X, 111.

— in organic compounds, detection,—VII, 132.

— in organic compounds, Kjeldahl’s method of determination,—VII, 130.

— iodide,—I, 4, 208.

— iodide, influence of light upon explosion of,—X, 332.

— liquefaction,—V, 146.

— loss by plants during germination and growth,—VIII, 327.

— peroxide, absorption spectrum,—VII, 32.

— soda-lime method of determining,—IX, 311.

— source of error in the determination of,—VII, 131.

— sources of error in determinations by soda-lime,—X, 113, 197, 262.

— tetroxide, conduct towards sulphuric acid,—IV, 75.

Nitrogenous organic compounds, analysis of,—III, 69.

β-Nitroisophthalic acid,—X, 485.

Nitromesitylene, oxidation,—VIII, 265.

Nitrometatoluic acid, preparation,—III, 426.

Nitrometaxylene, oxidation,—III, 424; X, 485.

Nitroparadibrombenzol, atomic migration in the molecule,—III, 186.

α-Nitroparatoluic acid, nitrile of,—X, 482.

β-Nitroparatoluic acid,—X, 477.

— nitrile of,—X, 476.

Nitroparaxylene, oxidation of,—X, 474.

Nitrophenetol, para,—I, 271.

Nitroprussides, new,—X, 222.

Nitrosulphobenzoic acid and derivatives,—I, 340.

Nitrotetraphthalic acid,—X, 483.

Nitrotoluuenes, oxidation with potassium ferricyanide,—V, 99.

Nitrotoluenesulphamide, oxidation,—VIII, 169.

Nitrous acid as a test for gallic acid,—IV, 403.

— detection of traces,—II, 69.

— test for,—IV, 403.
Index of Subjects.

Nitrous acid, volumetric determination in nitrites,—V, 388.
Nitrous oxide as an anesthetic,—I, 67, 302.
—— preparation and analysis,—IV, 403.
Nitrous and nitric oxides, lecture experiment showing composition by volume,—VIII, 92.
Nitrotoluenesulphamide, oxidation,—VIII, 169.
Nitroxylené, symmetrical, oxidation,—IV, 322.
Nomenclature, chemical,—IV, 311.
Norvegia,—I, 454.
Noxious vapors, removal in the evaporation of corrosive liquids,—VI, 144.

Oats, American, chemical composition and physical properties,—VIII, 364.
Obituary notes,—III, 436; VI, 431.
Oil, ethereal, from California bay tree,—II, 38.
Oils and fats, Hübli method for the examination of,—VI, 416.
—— detection of adulterations in,—VII, 92.
—— examination of,—VI, 285.
—— illuminating, for burning in lamps,—III, 62.
Oleomargarine, manufacture and use,—II, 145.
—— method of analysis,—X, 322.
Olive oil, density and refractive index,—X, 393.
Opium alkaloids,—II, 358.
—— analysis,—VIII, 295; X, 164.
—— determination of morphine in,—X, 247.
Optically active substances, artificial preparation,—VI, 120.
Orcin, action of chloral hydrate on,—IX, 134.
—— action of salicylic acid on,—V, 95.
—— action with benzoic aldehyde,—IX, 133.
—— and resorcin, action of ethyl aldehyde on,—V, 349.
Organic analysis by combustion, modifications of the methods of,—X, 433.
Organic bases, action of fluoride of silicon on,—X, 165.
Organic bodies, relation between physical properties and chemical composition,—III, 450.
Organic compounds, detection of nitrogen in,—VII, 132.
—— method for determining nitrogen in,—VII, 130.
Organic matter, determination in potable water,—IV, 241, 334, 426.
—— in water, determination,—II, 68.
Organic nitrogen, estimation,—IV, 404.
"Organische Chemie" (F. Beilstein), review,—II, 346.
"Organische Chemie" (A. Kekulé), review,—III, 442.
Orthite from Amelia Co., Va.,—IV, 138.
Orthoamidoparasulphobenzoic acid,—I, 353.
Orthoaizoxybenzanilide,—VI, 26.
Orthobrom a-toluic acid,—II, 316.
Orthobrombenzaldehyde,—III, 32.
Orthobrombenzyl alcohol,—II, 315.
Orthobrombenzylamines,—II, 317.
Orthobrombenzylbromide,—I, 100.
— action of sodium on,—II, 391.
— synthesis of anthracene and phenanthrene from,—II, 383.
Orthobrombenzyl compounds,—II, 315.
— cyanide,—II, 316.
Orthochloroparanitrophenetol,—II, 1, 121.
Orthocresol from oxytoluic acid,—I, 114.
Orthoiodobenzyl bromide and its derivatives,—IV, loi.
Orthoiodotoluolsulphonic acid,—VI, 170.
Orthometaphospho-tungstates,—VII, 404.
Orthosulphamine-benzoic acid,—I, 431; VIII, 179.
Orthosulphobenzoic acid,—I, 433.
— preparation,—IX, 399.
Orthotoluenesulphamide, oxidation,—I, 426; VIII, 178.
Orthotoluidine-benzene-sulphonate,—X, 135.
Orthotoluidine-paratoluene-sulphonate,—X, 144.
Orthotolyphthalamic acid,—IX, 53.
Orthotolyphthalimide,—IX, 51.
Osmyl ditetramine,—III, 233.
Oxalates containing chromium,—III, 197.
Oxalic acid, manufacture,—I, 279.
Oxanilide, halogen derivatives of,—VIII, 349.
— nitro derivatives,—IX, 355.
Oxidation and reduction, simultaneous, with hydrocyanic acid,—VII, 189.
— in the blood,—V, 145.
— of benzene derivatives with potassium ferricyanide,—V, 97; VII, 145; VIII, 176; IX, 93; X, 472.
— of substitution products of aromatic hydrocarbons,—I, 32, 114, 426; II, 50, 130, 405, 413; III, 204, 424; IV, 142, 197; V, 106, 149; VIII, 262.
— physiological,—IV, 395.
— with potassium permanganate,—VIII, 262.
Oxidising substances, volumetric determination,—III, 367.
Oxyacids, aromatic, action on phenols,—V, 81.
β-Oxybutyric aldehyde, formation from ethyl aldehyde,—V, 182.
Oxygen absorbed by water, determination,—II, 67; III, 66.
— absorption by pyrogallol in alkaline solution,—III, 366.
— acids of iodine,—IX, 143.
— active,—IV, 73.
— and hydrogen, relative values of atomic weights,—X, 81, 191.
— atomic weight,—X, 21, 249.
Index of Subjects.

Oxygen gas, manufacture and use,—I, 444.
— in the blood, estimation,—I, 285.
— in the sulphuric acid chamber, estimation,—I, 285.
— liquefaction,—V, 146.
— permeability of silver for,—VI, 283.
— photographic observations of the spectrum,—I, 71.
Oxyisophthalic acid (or o-phenol dicarbonic acid),—I, 131.
Oxymetatoluic acid, derivatives,—IV, 186.
a-Oxyphthalic acid,—VI, 282.
Oxytoluic acid, derivatives,—IV, 186.
— from sulphamineparatoluic acid,—II, 54.
Oysters, sewage in,—III, 380.
Ozocerite,—VI, 247.
Ozone, absorption of solar rays by atmospheric,—III, 153.
— action on carbon monoxide,—I, 373.
— action on coloring matter of plants,—I, 291.
— action on germs in the air,—III, 152.
— alleged, as a preservative,—III, 384.
— bleaching of sugar syrups by,—I, 291.
— formation and destruction,—III, 72.
— in the air,—II, 279; III, 67.
— liquefaction,—IV, 238.
— properties,—II, 433.
— solubility in water,—I, 292.
— transformation into oxygen by heat,—IV, 50.

P

Paints, vehicles for,—II, 422.
Palladium, rhodium and platinum, conduct towards illuminating gas,—III, 154.
Palmitic acid and the palmitins,—VI, 217.
— determination,—VI, 219.
— preparation,—VI, 217.
Palmitins, synthesis,—VI, 224.
Paper, manufacture,—III, 142.
Paraamidobenzoin sulphaneide,—VIII, 172.
Paraamidodimethyl aniline as a test for hydrogen sulphide,—V, 456.
Paraamidoorthosulphobenzoiic acid,—I, 351; IX, 410.
Paraamidophenol,—I, 271.
Paraazoacetanilide,—V, 282.
Paraazoaniline,—V, 283.
Paraazoxybenzanilide,—V, 284.
Paraazoxyacetanilide,—V, 2.
Paraazoxyaniline,—V, 3.
Index of Subjects.

Parabromalphatoluic acid,—III, 248.
Parabrombenzaldehyde,—III, 32.
Parabrombenzoic acid, preparation,—IX, 84.
— anhydride,—IX, 86.
— sulphinide,—VIII, 229.
Parabrombenzylalcohol,—III, 246.
Parabrombenzylamines,—III, 250.
Parabrombenzylbromide,—I, 95.
Parabrombenzyl compounds,—III, 246; V, 264.
Parabrombenzylcyanide,—III, 247.
Parabrombenzyldisulphide,—V, 269.
Parabrombenzylmercaptan,—V, 268.
Parabrombenzylmercaptid,—V, 268.
Parabrombenzylsulphide,—V, 267.
Parabrombenzylsulphoacid,—V, 264.
Parabrombenzylsulphone,—V, 267.
Parabromonthonitrophenetol,—III, 20.
Parabromoxanilic acid,—VIII, 354.
Parachlorbenzylalcohol,—II, 88.
Parachlorbenzaldehyde,—III, 31.
Parachlorbenzylamines,—II, 91.
Parachlorbenzylbromide,—I, 102.
Parachlorbenzylchloride,—II, 85.
Parachlorbenzyl compounds,—II, 85, 158.
Parachlorbenzylcyanide,—II, 88.
Parachlorbenzyldisulphide,—II, 168.
Parachlorbenzylethyl ether,—II, 170.
Parachlorbenzylmercaptan,—II, 167.
Parachlorbenzylmercaptid,—II, 168.
Parachlorbenzylsulphide,—II, 166.
Parachlorbenzylsulphoacid,—II, 159.
Parachlorbenzylsulphocyanate,—II, 91.
Parachlor-α-toluic acid,—II, 89.
Paracresy1 acetate,—X, 371.
Paradiazoothotoluenesulphonic acid, conduct towards alcohol,—VIII, 243.
Paradibromomethoazoacetanilide,—VIII, 347.
Paradibromoxanilide,—VIII, 351.
Paradiethylbenzenesulphamide,—IV, 200.
Paradijodoxanilide,—VIII, 352.
Paradinitro-oxyanilide,—IX, 355.
Paradipropylbenzenesulphamide, oxidation of,—V, 165.
Paradipropybenzenesulphonic acid,—V, 162.
Paraethoxybenzoic sulphinide,—VIII, 227.
Paraffin, liquid, reagent for detecting water in alcohol, chloroform and ether,—VI, 355.
Paraffins, liquid, action of heat on,—VIII, 1.
Index of Subjects.

Paraformnitranilide,—VIII, 346.

Parahydroxybenzoic acid, action of phosphorus pentachloride on,—X, 368.

Paraiodobenzaldehyde,—III, 32.

Paraiodobenzylacetate,—II, 251.

Paraiodobenzylalcohol,—II, 251.

Paraiodobenzylamines,—II, 255.

Paraiodobenzylbromide,—I, 103.

Paraiodbenzylicyanide,—II, 253.

Paraiodbenzyl compounds,—II, 250.

Paraiodbenzylsulphocyanate,—II, 255.

Paraiodo-f'-toluic acid,—II, 253.

Paraiodoxanilic acid,—VIII, 357.

Paramidoorthosulphobenzoic acid,—I, 351.

Parahydrodisulphaminebenzoic acid,—II, 186.

Paranitro and paraamidophenetol,—I, 271.

Paranitrobenzoic sulphinate,—VIII, 167.

Paranitroorthosulphobenzoic acid,—I, 349.

Para-oxy-meta-toluic acid, derivatives,—IV, 186.

Paraphenylene acetate, action of phosphorus pentachloride on,—IX, 211.

Parasulphaminebenzoic acid,—VIII, 182.

Parasulphaminecinnamic acid,—IV, 165.

Paratoluenesulphamide, oxidation,—II, 50; VIII, 266; IX, 93.

Paratoluenesulphonic acid, sulphoterephthalic acid from,—II, 413.

Par-oxy-m-toluic acid, derivatives,—IV, 186.

Peanut oil, density and refractive index,—X, 398.

Perfumes, manufacture,—III, 141.

Periodic acid, constitution,—IX, 143.

Periodic law, discovery of,—VI, 142.

Permanganate of potassium, use in presence of hydrochloric acid,—III, 231.
Index of Subjects.

Pernitric acid, formation,—III, 72.
Petrocine, a product of the destructive distillation of petroleum,—I, 30.
Petrocine, American,—II, 436.
— Caucasian,—II, 360; III, 301.
— commercial,—III, 302.
— flashing point of,—I V, 285, 293; VI, 18.
— forms of apparatus for determining flashing point,—V, 459.
Phenacetoin, sensitiveness as an indicator,—V, 217.
Phenanthrene, constitution,—II, 388.
— synthesis from α-brombenzylobromide,—II, 383.
Phenetol,—IX, 392.
— derivatives,—I I, 20.
α-Phenoldicarbonic acid,—I, 131.
Phenol glucoside, action of acetic anhydride on,—V, 171.
— synthesis,—I, 305.
Phenol phthalein as an indicator in alkalimetry,—III, 55.
— sensitiveness, as an indicator,—V, 217, 218.
Phenols, action of aldehydes on,—V, 338; IX, 130.
— action of aromatic oxyacids on,—V, 81.
Phenoyxyacetic acid, action of phosphorus pentachloride on,—IX, 216.
Phenoxybromacrylic acid,—VI, 190.
Phenoxybrommaleic acid,—VI, 193.
Phenyl acetate,—X, 369.
— action of phosphorus pentachloride on,—IX, 207.
Phenyaspartanil,—IX, 248.
Phenylaspartic acid,—IX, 245.
Phenyldibromlactic acid,—V, 386.
Phenylparatoluene sulphamide,—VIII, 242.
Phenyl propiolic acid, preparation,—VII, 153.
— propionate, action of phosphorus pentachloride on,—IX, 212.
— sulphinate of sodium, action on methylene iodide,—VI, 253.
— sulphonacetatic ethers, properties of,—V, 116; VII, 65.
β-Phenyltribrompropionic acid,—V, 383.
Phenyl-tribrompropionic acid, decomposition by water,—IV, 25.
Philippia,—I, 453.
Phloroglucinol, action with benzoic aldehyde,—IX, 132.
Phosphates, acid, manufacture,—VII, 135.
— commercial, basis for establishing the valuation,—VIII, 63.
— determination of reverted,—IV, 123.
Phosphide of hydrogen, determination,—I, 289.
Phosphides of iridium and platinum,—V, 231.
Phosphodivanadates,—VII, 217.
Phosphophytophospho-tungstates,—VII, 332.
Phosphonium and arsenium compounds, constitution of,—III, 299.
Phosphor-bronze,—I, 198.
Phosphoric acid, determination,—I, 84, 290; II, 70, 200; IV, 183, 404.
Phosphorosoc-phospho-molybdates,—VII, 332.
Phosphoric acid, determination by the molybdenum method,—V, 216.
 — estimation as magnesium pyrophosphate,—I, 391.
 — in iron ores,—IV, 1.
 — in phosphates, determination,—III, 360.
 — reversion of,—VI, 1.
 — volumetric determination,—V, 121; VII, 132.
Phosphorosomolybdates,—V, 366; VII, 324.
Phosphorosophosphotungstates,—VII, 331.
Phosphorosotungstates,—VII, 321.
Phosphorus anilide,—VI, 93.
 — carbon in,—VI, 72.
 — in iron and steel, determination,—VII, 296.
 — manufacture,—I, 442.
 — oxyiodide,—III, 280.
 — pentachloride, action on acetanilide,—IX, 217.
 — pentachloride, action on ethers of organic acids, and on acetic acid derivatives,—IX, 205.
 — pentachloride, action on three isomeric monohydroxybenzoic acids,—X, 296.
 — pentachloride, action on phenylacetate,—IX, 207.
 — pentasulphide, vapor density and formula,—I, 213.
 — quantitative estimation of carbon in,—VI, 153.
 — reduction of carbonic acid by,—I, 291.
 — trichloride, action on aniline,—VI, 89.
 — valence,—VII, 354.
 — white,—IV, 459.
Phosphotungstates,—II, 217.
Phospho-vanadates,—VII, 209.
Phospho-vanadico-vanadates,—VII, 220.
Phospho-vanadio-molybdates,—V, 391.
Phospho-vanadio-tungstates,—V, 394.
Phospho-vanadio-vanadico-tungstates,—V, 408.
Phosphuranylite,—I, 92.
Phthalamic acid,—III, 28.
Phthalate, mono-ethyl,—I, 413.
Phthaleins, new class of compounds analogous to,—VI, 180.
Phthalic acids, behavior towards aniline,—IX, 202.
 — manufacture,—I, 447.
Phthalic anhydride, action on naphthalene in the presence of aluminium chloride,—I, 267.
Phthalic sulphinide,—VI, 262.
Phthalamid,—III, 26.
"Physiological and Pathological Chemistry" (T. C. Charles), review,—VIII, 291.
Index of Subjects.

Physiological chemistry, reports,—II, 204, 268; III, 221, 360, 441; IV, 214, 461; V, 219; VI, 195.

Physiological oxidation,—IV, 395.

Picene,—III, 74.

Picraminic and isopicraminic acids and derivatives, comparison,—V, 37.

Pigments, artists',—III, 145.

— for house painters' use,—II, 421.

Pinus sabiniana, heptane from,—I, 155; VI, 28.

Piperidine, transformation into pyridine,—I, 454.

Piscidia, the active principle of Jamaica dogwood,—V, 39.

Plant physiology and chemistry,—II, 339.

Plants, acquisition of atmospheric nitrogen by,—VI, 365.

— approximate analysis of,—I, 377.

Platinum, atomic weight,—III, 155.

— conduct towards illuminating gas,—III, 154.

— new compounds of,—III, 350.

— phosphides,—V, 231.

— silicide,—VII, 172; VIII, 428.

— vessels, heated by gas flame, condition of atmosphere within,—X, 148.

Polariscope, Laurent's, note on the graduation,—VIII, 72.

Porcelain, manufacture,—II, 66.

Potash and soda, separation and determination in plant ashes, etc.,—III, 422.

— manufacture,—I, 280.

Potassium and sodium, separation of chlorides from lithium chloride by amyl alcohol,—IX, 33.

— bichromate, manufacture and use,—I, 358.

— bichromate, volumetric determination,—IV, 472.

— chlorate, manufacture,—I, 357.

— chloride, manufacture,—I, 357.

— chromate, alkalinity of,—IV, 472.

— chromate, use in preparing standard iodine solutions,—VI, 353.

— cyanide, decomposition,—X, 235.

— cyanide, manufacture,—I, 359.

— estimation in plant ashes,—I, 361.

— ferricyanide, oxidation of benzene derivatives with,—V, 97; VII, 145; VIII, 176; IX, 93; X, 472.

— ferrocyanide, manufacture,—I, 358.

— germanofluoride,—IX, 385.

— iodide, lead in,—I, 71.

— iodide, manufacture,—I, 441.

— iodide, removal of iodate from,—X, 321.

— nitrate, specific heat,—II, 374.

— permanganate, determinations with,—III, 231.
Index of Subjects.

Potassium permanganate, oxidation by means of,—VIII, 262.
— phthalate,—III, 29.
— reagent for detecting,—IV, 59.
— sulphate, manufacture,—I, 357.
— sulphide, solubility of sulphides of copper and zinc in,—VII, 144.

Potatoes, composition,—IX, 103.

Pottery, colors for glazing,—I, 294.

Precipitates, separation and treatment,—I, 317.

Pressure, union of bodies by,—VI, 129, 212; X, 243.

"Principien der Organischen Chemie" (E. Lellmann), review,—IX, 456.
"Principles of Chemistry" (P. Muir), review,—VI, 423.
"Principles of Theoretical Chemistry" (I. Remsen), reviews,—V, 465; IX, 457.

Propenyl-tricarboxylic acid, action of bromine on,—IX, 219.
Propionate,—III, 448.

Propimine sulphocyanide,—V, 227.
Propionic acids, constitution of the substituted,—IV, 273; V, 251; IX, 1.
— tetrasubstituted,—IV, 263.
Propyl alcohol,—VI, 243.
— decomposition by zinc chloride,—II, 23.

Propyl-benzoyl-ecgonine,—X, 147.

Propylethyl acetoacetate, preparation,—III, 385.
Protalbumose,—VI, 36.

Prout’s hypothesis and the atomic weight of silver,—VII, 104.

Ptomaines, reagent for distinguishing from vegetable alkaloids,—III, 382.

Publications relating to chemistry,—I, 75, 215, 301, 375, 456; II, 79, 216, 440; III, 74, 155, 303; IV, 158, 327, 408; V, 304; VI, 133, 146, 364, 433; VII, 430; IX, 145; X, 79.

Purpurogallin,—X, 48.

Putrefaction, volatile products of,—V, 138.

Pyridine, action of chlorine on,—VIII, 308.
— and quinoline bases, researches on,—V, 60; VII, 200.
— derivatives, synthesis,—VIII, 375.

Pyrogallol, action with benzoic aldehyde,—IX, 131.

Pyrolusite from Lehigh Co., Pa.,—V, 277.

Pyrometer,—IX, 296.

Pyromucic acids, substituted,—X, 373, 409.

Pyrophospho-tungstates,—VII, 396.

Pyroxanthin,—III, 332.

Pyrorol, conversion into pyridine,—IV, 323.
— and carbazol, relations between,—X, 440.
— and thiophene groups,—VI, 75.
Index of Subjects.

Q

Qualitative determination of bases without hydrogen sulphide,—VII, 21, 110.
Qualitative methods, new,—VII, 249.
"Quantitative Analysis" (A. Classen), review,—I, 207.

Tetrachloramidopyridine,—VIII, 393.
Tetrachloramidopyridine,—VIII, 393.
Tetralic acid, bromhydric acid addition-products,—IX, 277.
Thermochemical investigations on the theory of carbon compounds,—II, 347.
 "Thermochemical Researches" (J Thomsen), reviews,—V, 293; VI, 202.
Thermochemistry, foundations of,—V, 147.
Thermometers, calibration,—V, 308.
— mercury, with reference to determinations of melting and boiling points,—V, 307.
Thiophene and its derivatives,—VIII, 51.
— and pyrrol groups,—VI, 75.
— a new substance in benzene from coal tar,—V, 300.
Thorium, atomic weight,—IV, 405.
Thulia,—I, 453.
Timber, preservation,—II, 420.
Tin, action of vegetable acids on,—IV, 440.
— antimony and arsenic, separation,—VII, 133.
— Clarke's method of separation from arsenic and antimony,—I, 244.
— detection in the presence of antimony,—IV, 474.
— electrolytic determination,—IV, 58.
— metallurgy,—I, 185.
— note on a test for,—V, 72.
Index of Subjects.

Tinfoil, analyses of,—IV, 451.
Titanic acid, determination in iron ores,—IV, 3.
— precipitation,—IV, 211.
Titanic oxide in soils,—X, 36.
Titanite,—VI, 412.
— from Berks Co., Pa.,—V, 280.
Titanium and aluminium, separation,—VII, 283.
— and iron, separation,—VII, 294.
— detection and estimation,—V, 122.
— production by the action of sodium at low temperatures,—VI, 74.
Toluenedisulphamide, oxidation,—II, 185.
α-Toluenedisulphonic acid and its derivatives,—II, 181.
Toluene, metabrom, oxidation of,—VIII, 185.
Toluenesulphochloride, liquid,—I, 170.
Toluidine-sulphonic acids, separation,—VIII, 274.
Toluol, action of bromine on,—II, 1.
Tourmaline from Lehigh Co., Pa.,—V, 275.
“Traité de Chimie Général” (P. Schützenberger), review,—III, 433.
Triamidotritinitrobenzol,—X, 287.
Triamidotritinitrobenzol,—X, 290.
Triamine disilicotetrafluoride,—X, 166.
Tribenzoyle methane,—VII, 264.
Tribromacrylic acid and salts,—III, 178.
— crystalline form,—IV, 277.
Tribromisobutane,—IX, 88.
Tribrompropionic acid,—II, 17.
Tribrompropionic and dibromacrylic acids, relations between,—IV, 176.
Tribromtrinitrobenzol,—X, 283.
Trichinoline disilicotetrafluoride,—X, 175.
Trichloracrylic acid,—IX, 3.
Trichloramidopyridine,—VIII, 391.
Trichlorbenzol, symmetrical, action of nitric acid on,—IX, 348.
Trichloridinitrobenzol,—IX, 353.
Trichlorethoxyamidopyridine,—VIII, 395.
Trichloroxyamidopyridine,—VIII, 392.
Trichlorophenoxyethylene,—IX, 208.
Trichlorotrinitrobenzol,—IX, 354.
Trimethylamine disilicotetrafluoride,—X, 177.
Tridimethylamine disilicotetrafluoride,—X, 175.
Tridiphenylamine disilicotetrafluoride,—X, 174.
Triethylamine-benzene sulphonate,—X, 133.
Triethylamineparatoluene sulphonate,—X, 143.
Triethylamine uranate,—X, 221.
Trimethylamine-benzene sulphonate,—X, 131.
Trimethylamine paratoluene sulphonate,—X, 141.
Trimethylamine, production from vinasses,—I, 72.
Index of Subjects.

Trimethylamine uranate,—X, 220.
Trimethylene derivatives,—VI, 207.
Trimonochloraniline disilicotetrafluoride,—X, 173.
Trinitroisoxylene fluoride, from American petroleum,—II, 437.
Trinitrosodimethylaniline disilicotetrafluoride,—X, 294.
Triorthotoluidine disilicotetrafluoride,—X, 173.
Trioxypyridine anhydride,—VIII, 387.
Triparachlorbenzylamine,—II, 92.
Triparaiodbenzylamine,—II, 255.
Triparatoluidine disilicotetrafluoride,—X, 173.
Tripyridine disilicotetrafluoride,—X, 295.
Triquinoline disilicotetrafluoride,—X, 175.
Tropic acid, synthesis,—II, 436.
Tropine, dismemberment,—IV, 322.
Trypsin, proteolytic action in neutral, alkaline and acid solution,—VII, 46.
— influence of bile on the proteolytic action of,—VII, 50.
Tscheffkinite from Nelson Co., Va., analysis of,—X, 38.
Tube-stand for nesslerising,—IV, 313.
Tungstates, acid, titration,—VIII, 16.
Tungsten, atomic weight,—VIII, 280.
Tungstic acid, estimation,—V, 123.
Turmeric acid,—VI, 84.
— oil,—IV, 368.
— substances obtained from,—IV, 77, 368; VI, 77.
Turmerol,—IV, 368; VI, 81.
— isobutyl ether,—IV, 373.
Turmerylchloride,—IV, 371.

U

Uchatius, F. v. Obituary note,—III, 457.
“Ueber die räumliche Anordnung der Atome in organischen Molekuln” (J. Wislicenus), review,—IX, 453.
Umbellulic acid from nut of California bay tree,—IV, 206.
Union of bodies by pressure,—VI, 129, 213; X, 243.
Uranates of ammonium and of certain amines,—X, 219.
Uranine,—I, 69.
— absorption spectrum,—I, 211.
— test for bromine,—I, 70.
Uranium, atomic weight,—IV, 240.
— estimation and separation by electrolysis,—I, 329.
— investigation on,—IV, 474; V, 124.
— minerals from North Carolina,—I, 87.
— new salts of,—II, 331.
Uranotil,—I, 88.
Uranous salts, determination,—IV, 475.
Index of Subjects.

Urea, determination,—II, 204.
— estimation by sodium hypobromite,—IV, 47.
— estimation of,—VII, 142.
— formation,—V, 219.
— from ammonia and carbon dioxide,—IV, 35.
— in aqueous solution, detection,—V, 461.
— production from benzene, ammonia and the air,—III, 380.
— source of error in estimating by the hypobromite method with the
  Russell and West apparatus,—VIII, 124.
Uric acid, constitution,—V, 198.
— constitution and formula,—VI, 360.
— ethers of,—II, 305.
— synthesis,—IV, 406.
Urine, determination of nitrogen in,—I, 289.

V
Vanadates,—VII, 229.
Vanadic acid, determination,—I, 364.
— separation from the metals,—V, 123.
Vanadico-vanadates,—VII, 229.
Vanadio-molybdates,—V, 369.
Vanadio-tungstates,—V, 378.
Vanadio-vanadico-molybdates,—V, 402.
Vanadio-vanadico tungstates,—V, 405.
Vanadium and chromium, extraction from iron ores,—VIII, 437.
— conduct of compounds towards reagents,—VII, 349.
— extraction from magnetite,—VII, 349.
— quantitative determination,—VII, 349.
— separation from chromium,—VII, 349.
Vapor densities, estimation,—V, 71.
Vapor tensions, apparatus for,—V, 325.
Varnishes,—II, 422.
Varvacite from Wythe Co., Va., analysis of,—X, 41.
Vegetable acids, action on lead and tin,—IV, 440.
— coloring matter, new,—III, 22.
Vegetables, preserved,—II, 145.
Vesuvianite from Berks Co., Pa.,—V, 280.
Vinasses, trimethylamine and methyl chloride from,—I, 72; II, 149.
Vinegar, manufacture,—II, 149.
Viscosity, specific, relation to chemical composition,—III, 453.
Voorhees, H., note in regard to,—III, 426.
Index of Subjects.

W

Washing, materials used in,—III, 140.
Water, absorbing apparatus for, in elementary analysis,—VI, 353.
— analysis, ammonia method in,—IV, 188, 479.
— determination of minute quantities of carbon in,—I, 287.
— determination of nitrates in,—III, 367.
— in the air, determination,—III, 67.
— river,—II, 358.
— synthesis of, lecture experiment,—II, 246.
Water-bath, constant,—V, 140, 141.
— heated by steam,—III, 296.
Water-gas tar, anthracene from,—VI, 248, 431.
Waters, free oxygen and organic matter in natural,—III, 367.
Watts, H. Obituary note,—VI, 432.
Wavellite, etc., from Lehigh Co., Pa.,—V, 273.
Weights and measures, material for,—I, 67.
Weith, W. Obituary note,—III, 458.
Wheat and corn, chemical composition as influenced by environment,—VI, 302.
— chemical composition of the products obtained by roller milling,—VI, 388.
Whiskies, examination of,—VII, 425.
Wine, manufacture,—II, 147.
Wintergreen oil, action of gas from As₂O₃ and HNO₃ on,—VIII, 99.
Witherite, strontianite and calcite, artificial production,—IV, 316.
Wöhler, F. Obituary note,—IV, 289.
Wöhler monument,—IV, 483; VII, 429.
Wood, products of the dry distillation at low temperatures,—V, 256.
Wrought iron, steel and cast iron, relative oxidability of,—V, 144.

X

Xanthine, transformation into theobromine and caffeine,—IV, 72.
Xylenesulphamides, benzoyl derivatives,—IV, 192.
— oxidation,—I, 37, 114; III, 205.
a-Xylidine,—III, 432.
Xylidinic acid,—I, 119.

Y

Ytterbium, occurrence and properties,—I, 452.
Yttrium, atomic weight,—IV, 483.
Index of Subjects.

Z

"Zeitschrift für Physikalische Chemie" (W. Ostwald and J. H. van't Hoff),
review,—IX, 133.

Zinin, M. Obituary note,—II, 79.

Zinc and ammonia, some reductions with,—V, 1, 282.
— and cadmium nitrates, basic,—IX, 304.
— and calcium alloys,—X, 70.
— and nickel, separation,—VI, 149.
— atomic weight as determined by composition of the oxide,—X, 311.
— chloride, decomposition of alcohols by,—II, 20.
— determination,—I, 362; II, 72.
— dust, determination of value,—II, 201; VII, 52.
— electrolytic determination,—IV, 58.
— metallurgy,—I, 184.
— oxide, supposed dissociation of,—X, 148.
— separation from cadmium,—III, 229.
— separation from copper,—III, 229; V, 122.
— separation in ores, etc.,,—VI, 151.
— sulphide, solubility in melting potassium sulphide,—VII, 144.
— volumetric estimation,—IV, 53, 470.

"Zinc, pure," from the Bertha Zinc Co., analysis,—VIII, 431.

Zircon from Lehigh Co., Pa.,,—V, 273.
